

STAFF SELECTION COMMISSION
SUB-INSPECTOR IN DELHI POLICE AND
CENTRAL ARMED POLICE FORCES EXAMINATION (PAPER-I)

SOLVED PAPER

(12th December 2019: Shift-1)

Time Allotted- 2 hours

Max marks- 200

General Intelligence and Reasoning

1. How many triangles are there in the given figure?

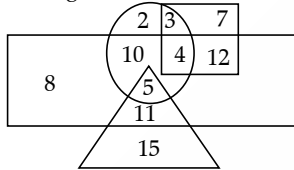

1. 20 2. 15 3. 17 4. 19

2. Select the option that will fill in the blank and complete the given series.

CDZ, DGE, EJJ, FMO, GPT, _____

1. HSY 2. HRZ 3. GRY 4. IQX

3. In the Venn diagram given below, the circle represents 'North Indian', the triangle represents 'Pianists', the rectangle represents 'Males' and the square represents 'Engineers'. The number given in the diagram represents number of persons of that particular category. Who among the following is a female. North Indian Engineer?

1. 5 2. 3 3. 2 4. 7

4. Select the option that will fill in the blank and complete the given series.

7, 16, 40, 84, _____, 252

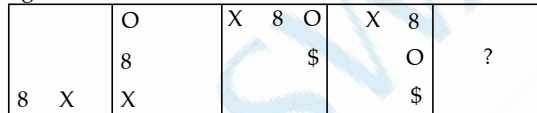

1. 153 2. 149 3. 150 4. 151

5. Which two signs need to be interchanged to make the following equation correct?

$45 - 9 \div 3 + 5 \times 6 = 32$

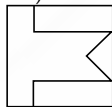

1. \times and + 2. \div and + 3. \times and \div 4. \div and -

6. Select the figure that will come next in the following figure series.

1. @ X, X, 8, O, 8 2. X, 8, O, 8, @, X, 8, O 3. @ X, X, 8, O, 8 4. @ X, X, 8, O, 8

7. Select the option in which the given figure is embedded. (Rotation is NOT allowed)

1. [Grid with zigzag] 2. [Grid with zigzag] 3. [Grid with zigzag] 4. [Grid with zigzag]

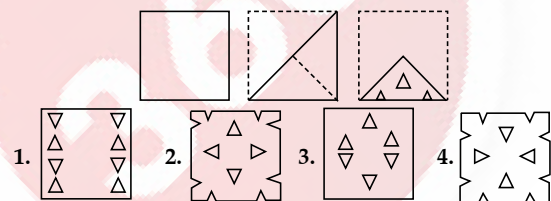

8. Seven professionals are standing in a row. A journalist is to the immediate right of a pharmacist and to the immediate left of a teacher. An advocate is on the immediate right of an accountant. The advocate and pharmacist have one person between them. The teacher and a doctor have two persons between them. An architect and the pharmacist have two persons between them. Who is in the middle?

1. Teacher 2. Journalist 3. Pharmacist 4. Doctor

9. In a certain code language, 'MACHINE' is written as 'N5XS3M4'. How will 'PREDICT' be written as in that language?

1. JI4V3YG 2. KI2W3YF 3. KI4W3XG 4. K34W3XH

10. The sequence of folding a piece of paper and the manner in which the folded paper has been cut is shown in the following figures. How would this paper look when unfolded?

11. Select the option in which the words share the same relationship as that shared by the given pair of words.

Fatigue : Rest

1. Disease : Medicine 2. Darkness : Night
3. Food : Hunger 4. Water : Thirst

12. If '+' means '-', '-' means 'x', 'x' means '÷' and '÷' means '+', then what will be the value of the following expression?

$27 - 2 + 24 \times 8 \div 4$

1. 55 2. 45 3. 51 4. 50

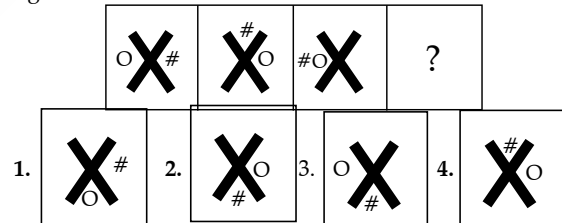

13. Which of the option figure is the exact mirror image of the given problem figure when the mirror is held to the right side of the problem figure?

Problem Figure:

LVN35ER24

1. 4SRJE5ENVJ 2. 4SRJE5ENVJ
3. 4SRJE5ENVJ 4. 4SRJE5ENVJ

14. Select the figure that will come next in the following figure series.

15. 'Link' is related to 'Chain' in the same way as 'Bead' is related to '_____'.
1. Sea 2. Pearl 3. Jewellery 4. Necklace

16. Four numbers have been given out of which three are alike in some manner, while one is different. Choose the odd one.

1. 171 2. 169 3. 195 4. 91

17. Read the given statements and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statements.

Statements:

- I. Some appliances are electronic.
 II. Some electronics are tube lights.

Conclusions:

- I. Some appliances are tube lights.
 II. No tube light is an appliance.
 1. Only conclusion I follows.
 2. Neither conclusion I nor II follows.
 3. Only conclusion II follows.
 4. Either conclusion I or II follows.

18. Select the option that is related to the third term in the same way as the second term is related to the first term.

WARDROBE : AWDROREB :: AQUARIUM : ?

1. UQAAIRMU 2. MUIRRAUQA
 3. QAAIURMU 4. QAAIURMU

19. Four words are given below, out of which three are alike in some manner and the fourth one is different. Select the odd one out.

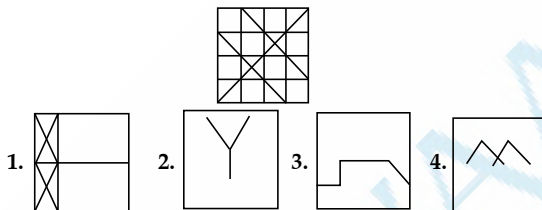

1. Error 2. Repair 3. Fault 4. Mistake

20. Select the option that is related to the third term in the same way as the second term is related to the first term.

HOSPITAL : JLWKOMIC :: MEDICINE : ?

1. OBHDIBVW 2. PBIHIBWV
 3. PCHDIBVW 4. OBHDIBVW

21. Select the option that is embedded in the given figure. (Rotation is NOT allowed)

22. Select the option in which the words are related in the same way as the given pair of words.

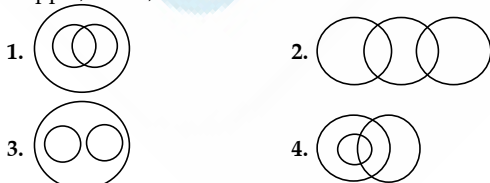

1. Rain : Tip-Tip 2. Bell : Temple
 3. Jackal : Roar 4. Drum : Strum

23. Four pairs of numbers have been given, out of which three are alike in some manner, while one is different. Choose out the odd one.

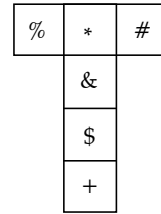

1. 73 - 79 2. 31 - 41 3. 61 - 71 4. 83 - 97

24. Select the Venn diagram that best represents the relationship between the following classes.

Copper, Metal, Iron

25. A cube is made by folding the given sheet. In the cube so formed, what would be the symbol on the opposite side of '+'?

1. # 2. % 3. \$ 4. &

26. Four pairs of numbers have been given, out of which three are alike in some manner, while one is different. Choose out the odd one.

1. 34 - 289 2. 16 - 64 3. 26 - 168 4. 18 - 81

27. Which of the given options would be a logical sequence of the following words?

1. Primary 2. Kinder Garten
 3. University 4. Secondary
 5. Higher Secondary

1. 2, 1, 5, 3, 4 2. 3, 1, 5, 2, 4 3. 5, 3, 1, 4, 2 4. 2, 1, 4, 5, 3

28. The statements are given followed by two conclusions I and II. Consider the given statements as true and decide which of the given conclusions logically follow/s from the given statements.

Statements:

United Nation has adopted 21st June as world Yoga day. This has promoted India's glorious tradition all over the world.

Conclusions:

- I. Yoga is practiced only on 21st June.
 II. More people are coming to India now to practice Yoga.

1. Neither conclusion I nor II follows.
 2. Only conclusion II follows.
 3. Only conclusion I follows.
 4. Both conclusions I and II follow.

29. Select the option in which the numbers do NOT share the same relationship as that shared by the given pair of numbers.

- (98, 107, 125)
 1. (122, 131, 149) 2. (319, 328, 346)
 3. (73, 82, 99) 4. (29, 38, 56)

30. Four pairs of numbers have been given, out of which three are alike in some manner, while one is different. Choose out the odd one.

1. 18 : 306 2. 13 : 182 3. 23 : 552 4. 25 : 650

31. Select the option that is related to the third number in the same way as the second number is related to the first number.

104 : 117 :: 216 : ?

1. 243 2. 245 3. 234 4. 342

32. Select the correct combination of mathematical signs to replace * signs and to balance the following equation.

$(18 * 9 * 14) * 37 * 4$

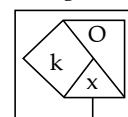

1. $- \div \times =$ 2. $\times \div - =$ 3. $\div - \times =$ 4. $\times - \div =$

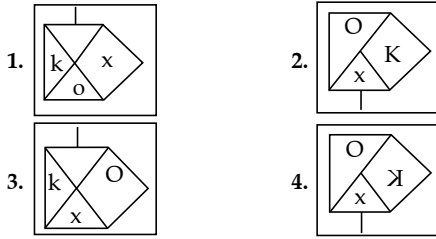

33. Select the option that is related to the third term in the same way as the second term is related to the first term.

Monk : Monastery :: Knight : ?

1. Stable 2. Cottage 3. Convent 4. Mansion

34. Which of the option figure is the exact mirror image of the given problem figure when the mirror is held to the right side of the problem figure?

35. If each of the letters in the English alphabet is assigned odd numerical value beginning with A = 1, B = 3 and so on, what will be the total value of the letters of the word NOMINAL?
1. 149 2. 144 3. 146 4. 150
36. Ameeta walks 20 m towards the north and then turns right and walks 30 m. Then she turns left and walks 25 m. After that she turns right and walks 30 m. From there, she turns right and walks 65 m. Then she again turns left and walks 40 m. She finally turns left and walks 20 m. How far is she from her home now and in which direction with reference to her home?
1. 20 m, West 2. 100 m, East
3. 20 m, East 4. 40 m, South
37. Identify the number that does NOT related to the following series.
25, 28, 23, 30, 21, 33
1. 23 2. 21 3. 33 4. 30
38. Four words have been given out of which three are alike in some manner, while one is different. Choose the odd one.
1. Car 2. Bus 3. Aeroplane 4. Petrol
39. Select the option that will fill in the blank and complete the given series.
6, 10, 19, 35, 60, _____
1. 98 2. 95 3. 93 4. 96
40. In a certain code language, 'REQUEST' is written as '22-21-7-23-19-7-20'. How will 'SWITCH' be written as in that language?
1. 21-25-11-22-5-10 2. 19-23-11-22-5-8
3. 10-5-20-11-25-21 4. 10-5-22-11-25-21
41. Study the given pattern carefully and select the number that can replace the question mark (?) in it.

15	196	14
18	255	?
7	96	16

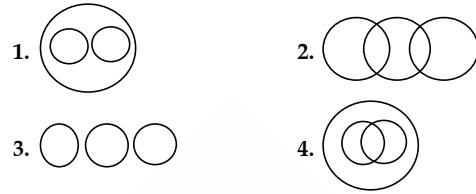

1. 8 2. 12 3. 15 4. 13
42. In a certain code language, O is written as R, R is written as A, A is written as I, I is written as N, N is written as E, E is written as P, P is written as T, C is written as M and L is written as L. How will PORCELAIN be written as in that language?
1. ERAMPLINT 2. TAMRPLINE
3. PLINETRAM 4. TRAMPLINE
43. Four pairs of letter-cluster have been given out of which three are alike in some manner, while one is different. Choose the odd one.
1. QSU - JHF 2. EGI - VTR
3. NOQ - MLK 4. BEG - YVT
44. Four letter-cluster have been given out of which three are alike in some manner, while one is different. Choose the odd one.
1. QFW 2. MLY 3. DGK 4. ENR
45. Select the option in which the numbers share the same relationship as that shared by the given pair of numbers.
72 - 14
1. 45 - 20 2. 92 - 17 3. 36 - 19 4. 81 - 80

46. Select the option that is related to the fifth number in the same way as the second number is related to the first number and the fourth number is related to the third number.

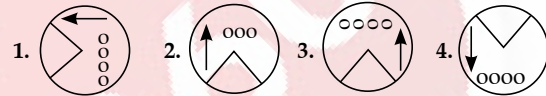

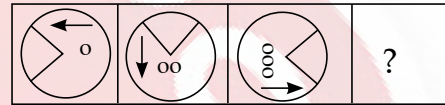

$$14 : 98 :: 18 : 162 :: 26 : ?$$

1. 328 2. 345 3. 262 4. 338

47. Select the Venn diagram that best represents the relationship between the following classes.
Flowers, Stems, Roots

48. Select the letter that can replace the question mark (?) in the following series.
X, U, P, M, ?, E
1. K 2. H 3. I 4. J
49. Select the figure that will come next in the following figure series.

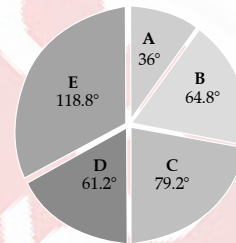

50. Arrange the following words in the order in which they appear in an English dictionary.
1. Appear 2. Apparent 3. Apostle 4. Apology
5. Appetite
1. 5, 4, 3, 1, 2 2. 3, 5, 4, 1, 2 3. 4, 3, 2, 1, 5 4. 5, 3, 4, 1, 2

General Knowledge and General Awareness

51. Who among the following was the first army officer of Independent India to be conferred the rank of Field Marshal?
1. Om Prakash Malhotra 2. Gopal Gurunath Bewoor
3. Tapishwar Narain Raina 4. Sam Manekshaw
52. Which of the following nutrients stores maximum energy per gram?
1. Vitamins 2. Proteins 3. Fat 4. Roughage
53. In which of the following states is Kardang Monastery situated?
1. Sikkim 2. Himachal Pradesh
3. Karnataka 4. West Bengal
54. Which Indian state has the second highest population after Uttar Pradesh as per Census 2011?
1. Bihar 2. West Bengal
3. Maharashtra 4. Madhya Pradesh
55. The blood vessels that carry blood from the heart to the various parts of the body are called:
1. Arteries 2. Veins 3. Septum 4. Capillaries
56. Lactometers (used to determine the purity of a sample of milk) and hydrometers (used to determine the density of liquids) are based on the _____ principle.
1. Archimedes 2. Special Relativity
3. Relativity 4. Uncertainty
57. Which female golfer has become the youngest Indian woman to win a Ladies European Tour (LET) title?
1. Diksha Dagar 2. Aditi Ashok
3. Amandeep Drall 4. Vani Kapoor

58. Which of the following personalities is NOT among the three Indians named in the Time's 2019 list of 100 most influential people?
 1. Indira Jaising 2. Arundhati Katju
 3. Menaka Guruswamy 3. Mukesh Ambani
59. In which province of Pakistan is the site of the ancient civilisation of Mohenjo Daro located?
 1. Balochistan 2. Sindh
 3. Khyber Pakhtunkhwa 4. Punjab
60. What is the minimum amount which can be remitted through Real Time Gross Settlement (RTGS)?
 1. ₹2,00,000 2. ₹1,00,000 3. ₹5,00,000 4. ₹3,00,000
61. Name the Sikh Guru who developed the Gurmukhi script for writing the Punjabi language?
 1. Guru Ram Das 2. Guru Hargobind
 3. Guru Tegh Bahadur 4. Guru Angad
62. Who among the following is the author of the book 'What happened'?
 1. Shashi Tharoor 2. Hillary Clinton
 3. Jean Dreze 4. Shimon Peres
63. Who among the following British Prime Ministers had announced the Communal Award in 1932 during India's Freedom Movement?
 1. Herbert Henry Asquith 2. Andrew Bonar Law
 3. David Lloyd George 4. James Ramsay MacDonald
64. Which among the following is a male part of a flower?
 1. Stigma 2. Stamen 3. Pistil 4. Style
65. The Finance Commission is constituted by the President at the expiration of every ____ year.
 1. Tenth 2. Seventh 3. Sixth 4. Fifth
66. Which among the following gases is also known as 'Laughing Gas'?
 1. Sulphur dioxide 2. Nitrous oxide
 3. Carbon dioxide 4. Carbon monoxide
67. The Prime Minister and the other Ministers of the Indian Union are appointed by the President under ____ of the Constitution of India.
 1. Article 70 2. Article 79 3. Article 75 4. Article 85
68. As per Census 2011, which state of India has the lowest sex ratio, i.e., number of females per 1000 males?
 1. Uttarakhand 2. Haryana
 3. Bihar 4. Maharashtra
69. Who among the following soccer stars bagged the FIFA's Best Men's Player Award 2019?
 1. Cristiano Ronaldo
 2. Neymar da Silva Santos Júnior
 3. Lionel Messi
 4. Luis Suarez
70. Which botanist is credited with creating one of the first widely used natural systems of plant classification?
 1. Joseph Banks 2. August Wilhelm Eichler
 3. Joseph Dalton Hooker 4. Robert Brown
71. Which British Viceroy of India was associated with the Ilbert Bill enacted in 1884?
 1. Lord Ripon 2. Lord Dufferin
 3. Lord Northbrook 4. Lord Napier
72. In which ocean is the island country Fiji situated?
 1. Indian Ocean 2. Arctic Ocean
 3. Atlantic Ocean 4. Pacific Ocean
73. As per Union Budget 2019-20, Indian economy is globally the ____ largest in Purchasing Power Parity (PPP) terms.
 1. Fifth 2. Second 3. Third 4. Fourth
74. Which state is the largest producer of mica in India?
 1. Madhya Pradesh 2. Rajasthan
 3. Jharkhand 4. Andhra Pradesh
75. Fatwa-i-Alamgiri, a digest of Muslim laws, was written during the period of which of the following kings?
 1. Nadir Shah 2. Aurangzeb
 3. Tipu Sultan 4. Feroz Shah Tughlaq
76. Which of the following rivers has its origin in Mahabaleshwar?
 1. Kaveri 2. Narmada 3. Tapti 4. Krishna
77. Who among the following has been selected for Padma Vibhushan Award under the category 'Trade and Industry-Infrastructure' for 2019?
 1. Anilkumar Manibhai Naik 2. Atul Punj
 3. GV Sanjay Reddy 4. Grandhi Mallikarjuna Rao
78. With which of the following musical instruments is the musician Sikkil Mala Chandrasekhar associated?
 1. Flute 2. Sitar
 3. Saraswati Veena 4. Shehnai
79. Who was the founder of Vakataka dynasty in the third century?
 1. Nagabhata 2. Vindhyashakti
 3. Pravarasena 4. Rudrasena
80. In which city is the head office of the Insurance Regulatory and Development Authority of India (IRDAI) situated?
 1. Hyderabad 2. Mumbai
 3. Kolkata 4. New Delhi
81. The famous dancer T Balasaraswati was an exponent of which of the following dance forms?
 1. Kuchipudi 2. Bharatanatyam
 3. Kathak 4. Kathakali
82. In which state is the Sarhul festival celebrated?
 1. Gujarat 2. Chhattisgarh
 3. Assam 4. Jharkhand
83. The part of the stem where a leaf arises is known as:
 1. node 2. tuber 3. carpel 4. bud
84. What is the minimum amount of monthly pension permissible under the Atal Pension Yojana?
 1. ₹4000 2. ₹1000 3. ₹2000 4. ₹3000
85. In which of the following parts of the human digestive system is the digestion of food completed?
 1. Small intestine 2. Large intestine
 3. Mouth 4. Stomach
86. The President may issue a proclamation of emergency under Article 356 on receipt of a report from the ____ of a state.
 1. Governor
 2. Chief Justice of the High Court
 3. Speaker of the Legislative Assembly
 4. Advocate-General
87. According to Article 361 of the Constitution of India, a criminal proceeding cannot be instituted in a court against the ____ during his term of office.
 1. Prime Minister 2. Vice-President
 3. Governor 4. Chief Minister
88. ____ is the highest peak of the Satpura range.
 1. Jarga 2. Dhupgarh
 3. Amarkantak 4. Delwara
89. Which of the following Indian wrestler has been ranked world number one in 86 kg category in the rankings issued in September 2019 by the International Wrestling Federation?
 1. Bajrang Punia 2. Rahul Aware
 3. Ravi Dahiya 4. Deepak Punia
90. Which one of the following is NOT a natural fibre?
 1. Terylene 2. Wool 3. Flax 4. Jute

91. The weight of an object on the moon is equal to ____ of its weight on the earth.
1. $1/10^{\text{th}}$ 2. $1/6^{\text{th}}$ 3. $1/8^{\text{th}}$ 4. $1/4^{\text{th}}$
92. As of October 2019, which of the following nations is at the top of the ICC World Test Championship table?
1. India 2. Australia
3. South Africa 4. England
93. The entire content of a living cell is known as ____ which includes the cytoplasm and the nucleus.
1. Mitochondria 2. Lysosomes
3. Protoplasm 4. Cell membrane
94. Which of the following statements is correct?
1. The first Lok Sabha was constituted in 1952.
2. The first Lok Sabha was constituted in 1947.
3. The first Lok Sabha was constituted in 1950.
4. The first Lok Sabha was constituted in 1948.
95. The strongest muscle (based on its weight) of the body is the masseter muscle and is located in the:
1. Jaw 2. Hand 3. Chest 4. Thigh
96. Which leader of India's freedom movement was called the 'Grand Old Man of India'?
1. Maulana Abul Kalam Azad
2. Bal Gangadhar Tilak
3. Lala Lajpat Rai
4. Dadabhai Naoroji
97. In 2019, which Indian became the youngest in the world to score a double hundred in 50-overs cricket including List A and ODIs?
1. Yashasvi Jaiswal 2. Shubman Gill
3. Prithvi Shaw 4. Abbas Ali Baig
98. The Indian Administrative Service and the Indian Police Service are deemed to be services created by the Parliament under:
1. Article 301 2. Article 307 3. Article 292 4. Article 312
99. Which among the following former cricketers has been elected unopposed as the President of BCCI in 2019?
1. Sourav Ganguly 2. Sunil Gavaskar
3. Dilip Vengsarkar 4. Sachin Tendulkar
100. As per Ministry of Statistics and Programme Implementation, which state of India has the highest per capita income as of Sep 2019?
1. Goa 2. Punjab 3. Tamil Nadu 4. Gujarat
103. When 3738, 5659 and 9501 are divided by the greatest possible number x , the remainder in each case is y . What is the sum of x and y ?
1. 3783 2. 3637 3. 3673 4. 3738
104. Pipes A and B together can fill a tank in 16 hours, whereas pipe C alone can empty the full tank in 24 hours. A and B were opened together for 10 hours and then closed. Pipe C was then opened. The tank will now be emptied by C in:
1. 18 hours 2. 12 hours 3. 10 hours 4. 15 hours
105. A certain sum (in ₹) is invested at simple interest at $x\%$ p.a. for 5 years. Had it been invested at $(x + 5)\%$ p.a., the simple interest would have been ₹9,200 more than the earlier one. What is the sum?
1. ₹36,800 2. ₹36,400 3. ₹35,800 4. ₹40,000
106. The profit on selling an article for ₹1,100 is equal to three times the amount of loss on selling it for ₹700. To gain 12.5%, the article must be sold for:
1. ₹956 2. ₹877.50 3. ₹787.50 4. ₹900
107. Study the given pie chart and answer the question that follows.

The total number of students in school D and E is what percentage more than the total number of students in schools B and C?

1. 20 2. 25 3. 30 4. 35

108. If $x^4 + x^2y^2 + y^4 = \frac{21}{256}$ and $x^2 + xy + y^2 = \frac{3}{16}$, then $2(x^2 + y^2)$

1. $\frac{3}{8}$ 2. $\frac{5}{8}$ 3. $\frac{3}{4}$ 4. $\frac{5}{16}$

109. If $2\sin\theta + 15\cos^2\theta = 7$, $0^\circ < \theta < 90^\circ$, then what is the value of $\frac{3 - \tan\theta}{2 + \tan\theta}$?

1. $\frac{1}{4}$ 2. $\frac{3}{4}$ 3. $\frac{1}{2}$ 4. $\frac{5}{8}$

110. A right circular cone of largest volume is cut out from a solid wooden hemisphere. The remaining material is what percentage of the volume of the original hemisphere?

1. 50% 2. $33\frac{1}{3}\%$ 3. 75% 4. $66\frac{2}{3}\%$

111. In $\triangle ABC$, $AB = c$ cm, $AC = b$ cm and $CB = a$ cm. If $\angle A = 2\angle B$, then which of the following is true?

1. $a^2 = b^2 - bc$ 2. $a^2 = b^2 - ac$ 3. $a^2 = b^2 + bc$ 4. $a^2 = b^2 + ac$

112. The average of eleven numbers is 68. The average of the first four numbers is 78 and that of the next four numbers is 63. The 9th number is two times the 11th number and the 10th number is 4 less than the 11th number. What is the average of the 9th and 11th numbers?

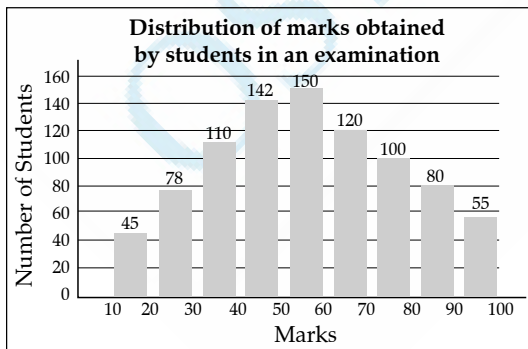

1. 70.1 2. 72.2 3. 70.5 4. 72.6

113. In an office, 70% of the total number of employees are females, 40% of the total number of employees, including 25 males, got promotion. If there are 105 female employees, then what percentage of female employees got promotion?

1. 30% 2. $33\frac{1}{3}\%$ 3. 40% 4. 35%

Quantitative Aptitude

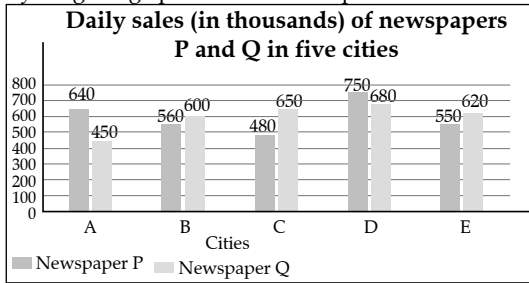

101. A circle is inscribed in an equilateral triangle of side 24 cm. What is the area (in cm^2) of a square inscribed in the circle?
1. 48 2. 72 3. 96 4. 54
102. Study the given graph and answer the question that follows.

The number of students who obtained 20 marks or more but less than 60 marks is:

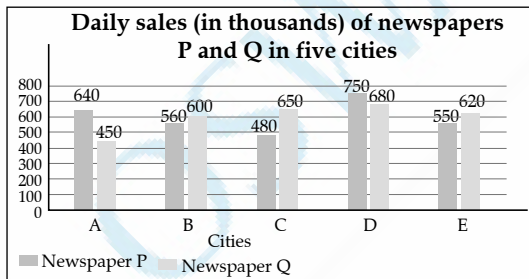

1. 402 2. 600 3. 480 4. 522

114. The average score of 42 students in a test is 69. The ratio of the number of boys to that of girls is 10 : 11. The average score of the boys is 20% more than that of the girls. The average score of the boys is:
 1. 82.8 2. 75.6 3. 73.5 4. 75.2
115. A is 40% more than B and B is 60% less than C. If C is 60% more than D, then which of the following is true?
 1. C is 60% more than B. 2. B is 36% less than D.
 3. D is 10.4% more than A. 4. A is 54% less than C.
116. Study the given graph and answer the question that follows.

In which city the daily sales of newspaper P is 1.25 times the average daily sales of newspaper Q in cities A, B, C, D and E?

1. B 2. D 3. C 4. A
117. A started a business with a capital of ₹1,12,000. After 2 months, B joined the business with a capital of ₹80,000, and after another 2 months, C joined the business with a capital of ₹72,000. After 10 months from the start of the business, B withdrew ₹8,000 and C also withdrew ₹8,000. If B received ₹9,800 as his share in the profit at the end of a year, then the total profit was:
 1. ₹30,800 2. ₹35,800 3. ₹32,400 4. ₹33,600
118. The value of $\frac{(0.13)^2 + (0.21)^2}{(0.39)^2 + 81(0.07)^2} \div \frac{(2.4)^4 + 3 \times (11.52) + 9}{(2.4)^6 + 6(2.4)^4 + 3 \times (17.28)}$ lies between:
 1. 0.7 and 0.8 2. 0.4 and 0.5
 3. 0.6 and 0.7 4. 0.5 and 0.6
119. An observer who is 1.62 m tall is 45 m away from a pole. The angle of elevation of the top of the pole from his eyes is 30°. The height (in m) of the pole is closest to:
 1. 26.8 2. 25.8 3. 26.2 4. 27.6
120. Study the given graph and answer the question that follows.

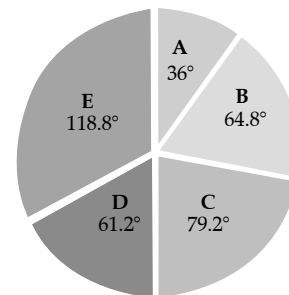

The total daily sales of newspaper P in cities B, D and E is what percentage less than that of newspaper Q in cities A, C, D and E?

1. 24.4 2. 22.5 3. 20.2 4. 20.8
121. The value of $\sqrt{6 - \sqrt{17 - 2\sqrt{72}}}$ is closest to:
 1. 2.1 2. 2.4 3. 2.7 4. 1.7
122. A works twice as fast as B and B works four as fast as C. All three working together can finish a task in 4 days

with the help of D. If D alone can finish the same task in 16 days, then in how many days will A alone finish 75% of the same task?

1. 9 2. 8 3. 7 4. 6
123. A can finish one-third of a work in 5 days, B can finish $\frac{2}{5}$ th of the same work in 10 days and C can finish 75% of the same work in 15 days. They work together for 6 days. The remaining work will be finished by B alone in:
 1. 2 days 2. $1\frac{1}{2}$ days 3. 3 days 4. 5 days
124. The volume of a solid right circular cylinder is 5326 cm³, and its height is 34 cm. What is its curved surface area (in cm²)? (Take $\pi = \frac{22}{7}$)
 1. 1496 2. 1573 3. 1650 4. 1804
125. The value of $8 \div [(9 - 5) \div \{(4 \div 2 \text{ of } 4) - (8 \div 8 \text{ of } 16) + (4 \times 2 \div 8)\}]$ is:
 1. $\frac{21}{8}$ 2. $\frac{23}{8}$ 3. $\frac{12}{23}$ 4. $\frac{32}{23}$
126. P is a point outside a circle and is 26 cm away from its centre. A secant PAB drawn from P intersects the circle at points A and B such that PB = 32 cm and PA = 18 cm. The radius of the circle (in cm) is:
 1. 12 2. 10 3. 13 4. 8
127. A conical vessel whose internal base radius is 18 cm and height 60 cm is full of a liquid. The entire liquid of the vessel is emptied into a cylindrical vessel with internal radius 15 cm. The height (in cm) to which the liquid rises in the cylindrical vessel is:
 1. 30.2 cm 2. 28.8 cm 3. 27 cm 4. 24 cm
128. The marked price of an article is ₹800. A retailer buys it for Rs. 540 after getting two successive discounts. The first discount is 25%. What is the second discount?
 1. 8% 2. 12% 3. 10% 4. 15%
129. Study the given pie chart and answer the question that follows.

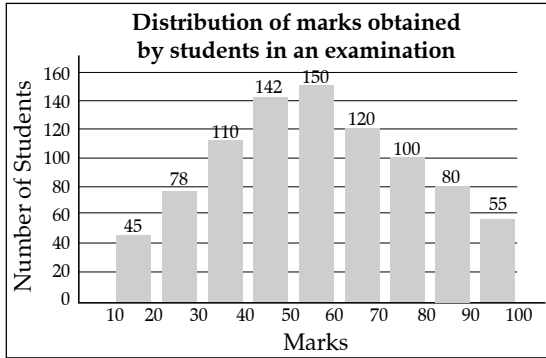

Distribution (degree wise) of students studying in schools A, B, C, D & E
 Total numbers of students = 9000

If the ratio of the number of boys to that of girls in school C is 6 : 5 and that in school B is 7 : 11, then what is the ratio of the number of boys in school C to the number of girls in school B?

1. 10 : 11 2. 11 : 10 3. 12 : 11 4. 11 : 12
130. If $\operatorname{cosec} \theta = 1.25$, then $\frac{4 \tan \theta - 5 \cos \theta + 1}{\sec \theta + 4 \cot \theta - 1} = ?$
 1. $\frac{9}{10}$ 2. 2 3. $\frac{10}{11}$ 4. $\frac{1}{2}$

131. Study the given graph and answer the question that follows.

If 60% of the total number of students obtaining 50 marks or more but less than 70 marks are girls and 55% of the total number of students obtaining 70 marks or more but less than 90 marks are also girls, then the total number of girls obtaining 50 marks or more but less than 90 marks is:

1. 261 2. 207 3. 236 4. 257

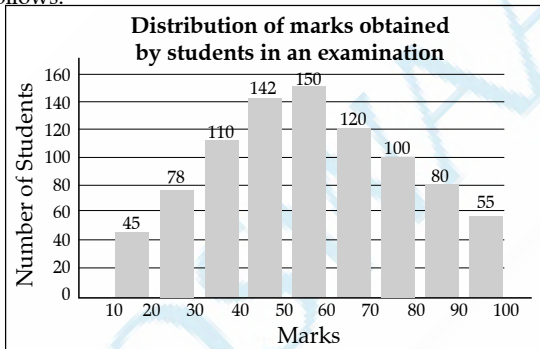

132. If $\frac{8x}{2x^2 + 7x - 2} = 1, x > 0$, then what is the value of $x^3 + \frac{1}{x^3}$?

1. $\frac{3}{8}\sqrt{17}$ 2. $\frac{3}{4}\sqrt{17}$ 3. $\frac{5}{8}\sqrt{17}$ 4. $\frac{5}{4}\sqrt{17}$

133. If a discount of 10% is allowed on the marked price of an article, a shopkeeper gets a profit of 25%. If he offers a discount of 25% on the marked price of the same article, then his percentage profit/loss will be:

1. 4% profit 2. $4\frac{1}{6}$ % loss
 3. $4\frac{1}{6}$ % profit 4. 4% loss

134. Study the given graph and answer the question that follows.

The total number of students obtaining less than 50 marks is what percentage more than the total number of students obtaining 60 marks or more (correct to one decimal place).

1. 6.8 2. 4.4 3. 5.6 4. 6.2

135. A sum of ₹5,000 amounts to ₹7,200 in 8 years at a certain rate per cent p.a. interest compounded yearly. What will be the compound interest on a sum of ₹6,550 in 4 years at the same rate of interest?

1. ₹1,290 2. ₹1,285 3. ₹1,415 4. ₹1,310

136. From the top of a lamp post of higher x metres, two objects on the ground on the same side of it (and in line with the foot of the lamp post) are observed at angles

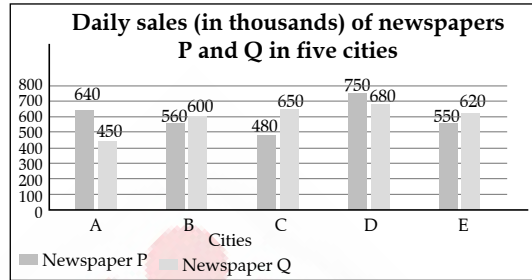

of depression of 30° and 60° , respectively. The distance between the objects is $32\sqrt{3}$ m. The value of x is

1. 54 2. 48 3. 45 4. 36

137. ABCD is cyclic quadrilateral. Sides AB and DC, when produced, meet at E, and sides BC and AD, when produced meet at F. If $\angle BFA = 60^\circ$ and $\angle AED = 30^\circ$, then the measure of $\angle ABC$ is:

1. 65° 2. 75° 3. 70° 4. 80°

138. Study the given graph and answer the question that follows.

What is the ratio of the total daily sales of newspaper P in cities A and C to the total daily sales of newspaper Q in cities B and D?

1. 16 : 17 2. 7 : 8 3. 15 : 16 4. 4 : 5

139. Seven years ago, the ages (in years) of A and B were in the ratio 4 : 5 and 7 years hence, their ages will be in the ratio 5 : 6. What will be the ratio of their ages 5 years from now?

1. 34 : 41 2. 33 : 40 3. 33 : 34 4. 31 : 33

140. Pipes A and B are emptying pipes and can empty a tank in 6 hours and 16 hours, respectively. C is a filling pipe. All the three pipes were opened together. They took 80 minutes to empty $\frac{5}{18}$ th of the tank. Pipe C alone can fill the tank in:

1. 36 hours 2. 42 hours 3. 48 hours 4. 40 hours

141. Let x be the least number divisible by 13, such that when x is divided by 4, 5, 6, 7, 8 and 12, the remainder in each case is 2. The sum of the digits of x is:

1. 10 2. 11 3. 9 4. 8

142. The value of $\left(3\frac{1}{3} - 2\frac{1}{2}\right) \div \frac{1}{4}$ of $1\frac{1}{4}$ is: $\frac{1}{15} \div \frac{1}{3} \div \frac{1}{3}$ of $\frac{1}{9}$

1. $\frac{4}{81}$ 2. $\frac{2}{9}$ 3. $\frac{9}{2}$ 4. $\frac{27}{8}$

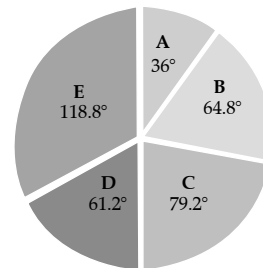

143. If the 5-digit number $538xy$ is divisible by 3, 7 and 11, then the value of $(x^2 + y^2)$ is:

1. 25 2. 10 3. 17 4. 13

144. Study the given pie chart and answer the question that follows.

Distribution (degree wise) of students studying in schools A, B, C, D & E

Total number of students = 9000

The number of students in school E exceeds the total number of students in school A and B by x , where x lies between:

1. 420 and 440 2. 440 and 460
3. 460 and 480 4. 400 and 420

145. A person rows a distance of $3\frac{3}{4}$ km upstream in

$1\frac{1}{2}$ hours and a distance of 13 km downstream in 2 hours. How much times (in hours) will the person take to row a distance of 90 km in still water?

1. 20 2. 18 3. 24 4. 15

146. The speed of train A is 16 km/h less than the speed of train B. To cover a distance of 384 km, B takes 4 hours less time than A. What is the speed (in km/h) of train B?

1. 50 2. 45 3. 48 4. 32

147. In $\triangle ABC$, $\angle C = 90^\circ$ and D is a point on CB such that AD is the bisector of $\angle A$. If AC = 5 cm and BC = 12 cm, then what is the length of AD?

1. $\frac{10}{3}$ cm 2. $\frac{5\sqrt{13}}{6}$ cm 3. $\frac{5\sqrt{13}}{3}$ cm 4. $\frac{20}{3}$ cm

148. If $a = 500$, $b = 502$ and $c = 504$, then the value of $a^3 + b^3 + c^3 - 3abc$

1. 15060 2. 12048 3. 18072 4. 17040

149. The lengths of the parallel sides of a trapezium are 51 cm and 21 cm, and that of each of the other two sides is 39 cm. What is the area (in cm^2) of the trapezium?

1. 1206 2. 1296 3. 1152 4. 1260

150. If $66\frac{2}{3}\%$ of 75% of one-eighth of a certain number is

179, Then $33\frac{1}{3}\%$ of three-fourth of that number is:

1. 537 2. 787.6 3. 859.2 4. 716

English Comprehension

151. Select the INCORRECTLY spelt word.

1. aggregate 2. acquisition
3. acquaintance 4. explanation

152. Select the most appropriate option to fill in the blank.

The majority _____ that the country can progress under able leadership.

1. have believed 2. believe
3. is believing 4. believes

153. Select the most appropriate synonym of the given word. JEOPARDY

1. protection 2. prevention
3. peril 4. promotion

154. Select the most appropriate option to substitute the underlined segment. If no substitution is required select 'No substitution'.

It would be wise to accept the company's offer lest you should regret later.

1. lest you shall not regret 2. lest you should not regret
3. lest you would regret 4. No substitution

155. Select the most appropriate option to substitute the underlined segment. If no substitution is required select 'No substitution'.

His employees were asking him for a raise for a long time now.

1. asked him for a rise
2. No substitution
3. are asking him of a raise
4. have been asking him for a raise

Comprehension:

Read the given passage and answer the questions that follow. Pollution befouls the air and poisons water. Pollution induces the release of toxicants into the biosphere which makes the air unsuitable for breathing, harms the quality of water and soil, and causes the emission of substances that may cause damage to humans, plants and animals.

To cater to the needs of an increasing population, agriculture has been intensified through the use of a wide spectrum of fertilizers and pesticides. Diverse industries have been set up to produce chemicals including those that pose a danger to all life forms.

Rapid industrialisation has led to deterioration in the quality of air. Widespread use of coal and fossil fuels in industries and petroleum fuel in motor vehicles has aggravated the air pollution problem. Our atmosphere seems to have become a waste basket into which dust, noxious fumes, toxic gases and other pollutants are callously thrown.

The intensity of air pollution in Indian cities is increasing primarily due to our vintage vehicles and their poor performance. Water pollution, too has increased with the growth of our population and also that of our industries. Water pollution has acquired dangerous dimensions ever since sewage and industrial effluents have started being disposed of into the rivers.

Once considered sacred, the rivers are now turning murky and stink. It is sad that almost three-fourths of our fellow citizens have no choice but to drink filthy water. The severely polluted rivers due to mindless dumping of sewage and industrial wastes are a cause for concern not only to us humans but also to myriads of life forms that exist in water.

On the French and Italian rivieras we can no longer see the sparkling blue waters. The Mediterranean Sea is reported to be turning grey. Rivers and canals pour sewage, detergents and industrial waste into the sea; tankers flush their contents near the river or sea; bottles, rotting garbage and oil slicks are washed into the beaches. The phosphates and nitrates applied to farmlands as inorganic fertilizers, concentrate in lakes and estuaries causing algal blooms due to which wide expanses of water get choked, plants rot, oxygen is used up and fish die.

156. Which of the following factors is responsible for algal blooms?

1. Using up of oxygen dissolved in the water by algae
2. Rotting of aquatic plants in lakes and estuaries
3. Concentration of inorganic fertilizers in lakes
4. Farmlands being located near lakes and estuaries

157. Since when has water pollution acquired dangerous dimensions?

1. Since sacred rivers became murky and lost their sanctity
2. Since sewage and industrial effluents started being disposed of in rivers
3. Since the Mediterranean Sea started changing colour
4. Since oil slicks started being washed on the shores of beaches

158. As per the passage, which of these statements is NOT true about air pollution?

1. Vintage vehicles and their poor performance adds to pollution.
2. Dust and toxic gases released in the air cause air pollution.
3. Three-fourths of our citizens are breathing poor quality air.
4. Use of coal and fossil fuels aggravates air pollution.

159. Select the most appropriate title for the passage

1. The Saga of Sacred Rivers
2. We Breathe and Drink Poison
3. Impact of Industrialisation
4. Algal Blooms

160. Deterioration in the quality of air can mainly be attributed to
1. intensified agricultural practices
 2. global climate change
 3. rapid industrialisation
 4. increase in population
161. Select the correctly spelt word.
1. humillated
 2. humelated
 3. humilated
 4. humiliated
162. Select the most appropriate option to substitute the underlined segment. If no substitution is required select 'No substitution'.
- This is one of the boldest economic reform that have ever been introduced.
1. economic reforms that has ever
 2. economic reform that has ever
 3. economic reforms that have ever
 4. No substitution
163. Select the most appropriate ANTONYM of the given word. ENDURANCE
1. patience
 2. persistence
 3. tolerance
 4. indolence
164. Select the most appropriate meaning of the underlined idiom in the sentence.
- My brother has decided to settle in Mumbai for good.
1. for better income
 2. for new opportunities
 3. for a while
 4. forever
165. Select the most appropriate meaning of the underlined idiom in the sentence.
- In spite of the high sounding words, his speech fell flat on the audience.
1. failed to make an impact
 2. impressed a lot
 3. appealed to the sentiments of the audience
 4. could not be heard clearly
166. Select the most appropriate ANTONYM of the given word. ADEPT
1. inept
 2. expert
 3. proficient
 4. deft
167. Select the option which is the most appropriate one word substitution for the given group of words.
- A decision which cannot be taken back
1. irrevocable
 2. infallible
 3. irrational
 4. indelible
168. Select the most appropriate meaning of the underlined idiom in the sentence.
- Simran was under tremendous stress because she had too many irons in the fire.
1. She had made a lot of risky investments
 2. She was suffering from many ailments
 3. She was involved in many activities
 4. She had too many clothes to iron
169. Select the option which is the most appropriate one word substitution for the given group of words.
- Statement open to more than one interpretation
1. ambrosial
 2. ambiguous
 3. ambidextrous
 4. ambushed
170. Identify the segment in the sentence which contains the grammatical error. If there is no error, select 'No error'.
- The detective compared the forged signature to the original.
1. the forged signature
 2. to the original
 3. The detective compared
 4. No error
171. Identify the segment in the sentence which contains the grammatical error. If there is no error, select 'No error'.
- If she left now, she would reach the station on time.
1. she would reach
 2. the station on time
 3. if she left now
 4. No error
172. Select the most appropriate synonym of the given word. IGNOMINY
1. morality
 2. virtue
 3. disgrace
 4. esteem
173. Identify the segment in the sentence which contains the grammatical error. If there is no error, select 'No error'.
- He wouldn't let anyone to drive his new car.
1. his new car
 2. anyone to drive
 3. No error
 4. He wouldn't let
174. Select the option which is the most appropriate one word substitution for the given group of words.
- One who travels by foot
1. propagandist
 2. protagonist
 3. paediatrician
 4. pedestrian
175. Select the most appropriate option to substitute the underlined segment. If no substitution is required select 'No substitution'.
- If you will bring a letter of introduction, I will consider your request.
1. No substitution
 2. if you bring
 3. if you will be bringing
 4. if you brings
176. Select the correctly spelt word.
1. omelete
 2. omelette
 3. omlate
 4. omelate
177. Select the most appropriate synonym of the given word. SANCTION
1. grace
 2. approval
 3. mercy
 4. denial
178. Select the most appropriate option to fill in the blank.
- Please sign these documents _____ ink so that they can be preserved .
1. with
 2. by
 3. from
 4. in
179. Select the most appropriate meaning of the underlined idiom in the sentence.
- The aged man preferred to die in harness than lead a rusted life.
1. to keep one's belongings safe
 2. to live in perpetual slavery
 3. to continue occupation till death
 4. to lead a life of comfort
180. Select the most appropriate meaning of the underlined idiom in the sentence.
- All those who carried the day in reality shows failed to make a mark later.
1. made a guest appearance
 2. won a victory
 3. acted as hosts
 4. participated
181. Select the most appropriate synonym of the given word. INCESSANT
1. intermittent
 2. persistent
 3. transient
 4. inconstant
182. Select the most appropriate ANTONYM of the given word. MORTALITY
1. lethality
 2. death
 3. fatality
 4. birth
183. Select the most appropriate option to fill in the blank.
- The company has appointed twice as _____ women as men.
1. most
 2. many
 3. more
 4. much
184. Select the most appropriate option to substitute the underlined segment. If no substitution is required select 'No substitution'.
- She has no other hobby but that of collecting coins.
1. not other hobbies but
 2. No substitution
 3. no another hobby but
 4. no other hobby than
185. Select the most appropriate synonym of the given word. FATIGUE
1. liveliness
 2. weariness
 3. freshness
 4. brightness

186. Select the INCORRECTLY spelt word.
 1. schedule 2. vacuum
 3. tranquility 4. acceleration
187. Select the option which is the most appropriate one word substitution for the given group of words.
 Animals living in flocks
 1. gregarious 2. bohemian
 3. social 4. herbivorous
188. Select the most appropriate ANTONYM of the given word.
 RECKLESS
 1. brash 2. heedless 3. daring 4. cautious
189. Select the most appropriate ANTONYM of the given word.
 INSIDIOUS
 1. treacherous 2. sincere
 3. stealthy 4. astute
190. Select the option which is the most appropriate one word substitution for the given group of words.
 One who holds established opinions
 1. atheist 2. monotheist
 3. orthodox 4. missionary
191. Select the INCORRECTLY spelt word.
 1. ecstasy 2. diagnosis 3. athlete 4. accumulate
192. Identify the segment in the sentence which contains the grammatical error. If there is no error, select 'No error'.
 Among the reasons cited by the employee for quitting the job were the pressure of work, the outstation duties and desiring to pursue her hobbies.
 1. Among the reasons cited by the employee
 2. and desiring to pursue her hobbies
 3. No error
 4. were the pressure of work, the outstation duties

193. Identify the segment in the sentence which contains the grammatical error. If there is no error, select 'No error'.
 The monsoon have, in the past five days, retreated from most parts of the country.
 1. The monsoon have 2. in the past five days
 3. No error 4. retreated from most parts
194. Select the most appropriate option to fill in the blank.
 They postponed _____ on vacation due to adverse weather conditions.
 1. to go 2. for going 3. to be gone 4. going
195. Select the most appropriate option to fill in the blank.
 _____ of these boys is doing anything worthwhile.
 1. either 2. each 3. none 4. both

Comprehension:

In the following passage some words have been deleted. Fill in the blanks with the help of the alternatives given. Select the most appropriate option for each blank.

If you don't have a lump sum to invest in a fixed deposit, you can (1)_____ opt for a long- term recurring deposit, (2)_____ the minimum amount of monthly investment is (3)_____ low as Rupees 100. At the end of the (4)_____ you get back the amount invested (5)_____ with the interest earned on it. It is a good way of saving money regularly.

196. Select the most appropriate option to fill in blank No.1.
 1. sure 2. assured 3. surely 4. ensure
197. Select the most appropriate option to fill in blank No.2.
 1. where 2. when 3. wherefore 4. whenever
198. Select the most appropriate option to fill in blank No.3.
 1. as 2. so 3. too 4. just
199. Select the most appropriate option to fill in blank No.4.
 1. timing 2. time 3. tenure 4. interval
200. Select the most appropriate option to fill in blank No.5.
 1. along 2. among 3. as well as 4. besides

Answer Key

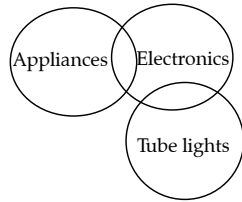

1.	(4)	2.	(1)	3.	(2)	4.	(1)	5.	(4)	6.	(1)	7.	(4)	8.	(3)	9.	(3)	10.	(4)

Answers with Explanations

1. Option (4) is correct.
 We know that when we have a rectangle with 2 diagonals, then we have $2 \times 4 = 8$ triangles and we also know that when we have a triangle with one perpendicular, then we have 3 triangles so we have 4 such triangles then we

have total $4 \times 3 = 12$ but we have to remove 4 triangles, then we have $12 - 4 = 8$. Now, we have total $8 + 8 = 16$ triangles and then start counting random triangles.

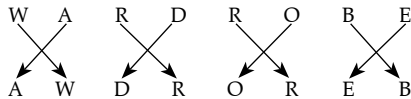

17. **Option (4) is correct.**

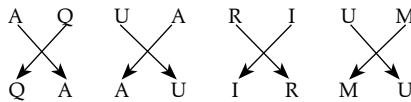

From the above Venn diagram, both conclusions don't follow but it is a complementary pair; therefore, it becomes either or case. (Note: Some + No forms). Hence, either or is the correct answer.

18. **Option (3) is correct.**

The pattern is as follows:

Similarly,

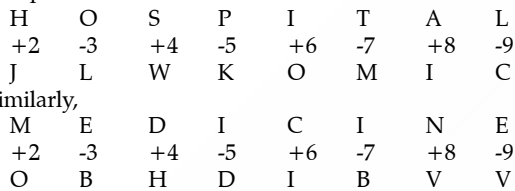

Hence, QAAUIRMU is the correct answer.

19. **Option (2) is correct.**

Error, Mistake are the synonyms of each other while Repair corrects the faulty things. Hence, Repair is the correct answer.

20. **Option (4) is correct.**

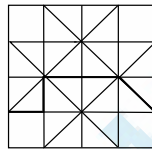

The pattern is as follows:

Hence, OBHDIBVV is the correct answer.

21. **Option (3) is correct.**

The figure shows how it is embedded in the below figure.

22. **Option (1) is correct.**

Rustling is the sound of leaves, in the same way, pitter-patter is the sound of rain.

23. **Option (1) is correct.**

The pattern is that there is no prime number between 73-79 as they are consecutive.

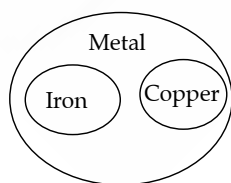

Option 2: 31-41 There is one prime number between them.

Option 3: 61-71 There is one prime number between them.

Option 4: 83-97 There is one prime number between them.

24. **Option (3) is correct.**

We know that both copper and iron are types of metals so they both will come inside Metal.

25. **Option (4) is correct.**

As we know that alternate pairs are opposite to each other. Therefore, opposite of \$ is * and the opposite of # is %. Hence, the opposite of + is &.

26. **Option (3) is correct.**

The pattern is $(1^{\text{st}} \text{ number} \div 2)^2 = 2^{\text{nd}} \text{ number}$.

Option 1. $\left(\frac{34}{2}\right)^2 = 289 \Rightarrow$ Option 2. $\left(\frac{16}{2}\right)^2 = 64$

Option 3. $\left(\frac{26}{2}\right)^2 = 169$ not 168.

Option 4. $\left(\frac{18}{2}\right)^2 = 81$

27. **Option (4) is correct.**

The best method to arrange this would be in the ascending order or increasing order.

A child is first admitted in the Kinder Garten. After that, he is admitted in Primary, and then in secondary after that in Higher secondary and then in University.

Hence, 2, 1, 4, 5, 3 is the correct answer.

28. **Option (1) is correct.**

Conclusion I. It is mentioned that yoga was adopted on 21st June but it is not necessary that it will be practiced only on 21st June. It means this conclusion does not follow.

Conclusion II. It is not necessary that people will come to India and then practice yoga; they can practice anywhere. So, this conclusion also does not follow.

Hence, option 1 is the correct answer as neither conclusion I nor conclusion II follow.

29. **Option (3) is correct.**

The pattern is as follows:

$98 + 9 = 107$ $107 + 18 = 125$

Option 1: $122 + 9 = 131$ $131 + 18 = 149$

Option 2: $319 + 9 = 328$ $328 + 18 = 346$

Option 3: $73 + 9 = 82$ $82 + 17 = 99$

Option 4: $29 + 9 = 38$ $38 + 18 = 56$

Hence, option 3 is the correct answer which is option 3.

30. **Option (1) is correct.**

The pattern is as follows:

Option 1: $18 : 306 \rightarrow 18^2 - 18$

Option 2: $13 : 182 \rightarrow 13^2 + 13$

Option 3: $23 : 552 \rightarrow 23^2 + 23$

Option 4: $25 : 650 \rightarrow 25^2 + 25$

31. **Option (1) is correct.**

The pattern is $104 : 117 = 13 \times 8 : 13 \times 9$.

Similarly,

$216 : ? = 27 \times 8 : 27 \times 9 = 216 : 243$.

Hence, 243 is the correct answer.

32. **Option (4) is correct.**

Using option 4 we get, $(18 \times 9 - 14) \div 37 = 4$.

$\Rightarrow (162 - 14) \div 37 \Rightarrow 148 \div 37 = 4$

Therefore, LHS = RHS.

33. **Option (4) is correct.**

A monk is a member of a religious order who stays in a monastery.

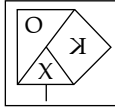

Similarly, A knight is a man who serves his lord as a soldier. Knight stays in a mansion.

Mansion is related to the third term; in the same way, as the second term is related to the first term.

Hence, mansion is the correct answer.

34. **Option (4) is correct.**

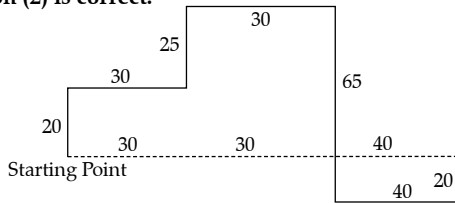

We know that when the mirror is placed on the right side, then the objects which appear on the left side will be shifted to the right side and the objects which appear on the right side will be shifted to left side and the position of the object will also change accordingly.

35. **Option (1) is correct.**

If the positional value of a letter is "n", then the code of the letter will be "2n - 1".
 NOMINAL => N = 27, O = 29, M = 25, I = 17, N = 27, A = 1, L = 23.
 So, total will be 27 + 29 + 25 + 17 + 27 + 1 + 23 = 149
 Hence, 149 is the correct answer.

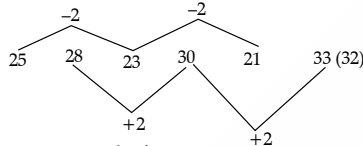

36. **Option (2) is correct.**

From the above diagram, she is 100 m to the east with reference to her home.
 Hence, 100 m East is the correct answer.

37. **Option (3) is correct.**

The series is double series as follows:

It should be 32 instead of 33.
 Hence, 33 is the correct answer.

38. **Option (4) is correct.**

We know that petrol is used in Car, Bus, Aeroplane, thus is the odd one.
 Hence, petrol is the correct answer.

39. **Option (4) is correct.**

The given series is 6, 10, 19, 35, 60, 96.
 6 10 19 35 60 96
 +4 +9 +16 +25 +36
 2² 3² 4² 5² 6²

Hence, 96 is the correct answer.

40. **Option (4) is correct.**

The pattern is reverse the word and then numerical value in alphabetical English and add 2.

R	E	Q	U	E	S	T
T	S	E	U	Q	E	R
20 + 2	19 + 2	5 + 2	21 + 2	17 + 2	5 + 2	18 + 2
= 22	= 21	= 7	= 23	= 19	= 7	= 20

Similarly,

S	W	I	T	C	H
H	C	T	I	W	S
8 + 2	3 + 2	20 + 2	9 + 2	23 + 2	19 + 2
= 10	= 5	= 22	= 11	= 25	= 21

Hence, 10-5-22-11-25-21 is the correct answer.

41. **Option (3) is correct.**

The pattern is taking row wise.
 (1st number-1) × 3rd number = 2nd number.

Row 1: (15 - 1) × 14 = 196

Row 2: (18 - 1) × n = 255

$$\Rightarrow n = \frac{255}{17} = 15 \Rightarrow n = 15$$

Row 3: (7 - 1) × 16 = 96

Hence, 15 is the correct answer.

42. **Option (4) is correct.**

The code for PORCELAIN will be
 P O R C E L A I N
 T R A M P L I N E
 Hence, TRAMPLINE is the correct answer.

43. **Option (3) is correct.**

The pattern is
 Option 1: QSU-JHF
 Q + 2 S + 2 U ----- J - 2 H - 2 F
 Option 2: EGI-VTR
 E + 2 G + 2 I ----- V - 2 T - 2 R
 Option 3: NOQ-MLK
 N + 2 O + 2 Q ---- M - 2 L - 1 K
 Option 4: BEG-YVT
 B + 2 E + 2 G ----- Y - 2 V - 2 T
 Hence, NOQ---MLK is the correct answer.

44. **Option (4) is correct.**

The pattern is as follows:
 Option 1: 17 6 23
 Q F W
 ⇒ 23 - 17 = 6
 Option 2: 13 12 25
 M L Y
 ⇒ 25 - 12 = 13
 Option 3: 4 7 11
 D G K
 11 - 4 = 7
 Option 4: 5 14 18
 E N R
 ⇒ 18 - 5 = 13 (14)

Instead of 13, it should be 14.
 Hence, ENR is the correct answer.

45. **Option (1) is correct.**

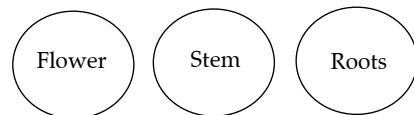

The pattern is 7 × 2 = 14
 Now, we know 5 × 4 = 20.
 Hence, 45 - 20 is the correct answer.

46. **Option (4) is correct.**

The pattern is that 2nd number is divisible by 1st number.
 Similarly, 338 is divisible by 26.
 Hence, 338 is the correct answer.

47. **Option (3) is correct.**

Flower, stem and roots are three different things so they have to be represented separately.

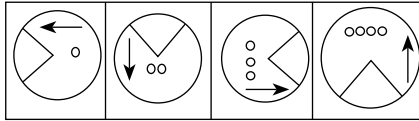

48. **Option (2) is correct.**

The pattern is X, U, P, M, ?, E
 X U P M ?(H) E
 24 21 16 13 8 5
 3 5 3 5 3

Hence, H is the correct answer.

49. **Option (3) is correct.**

The triangle-like shape is moving 90° in the clockwise direction and the small circle are increased by one in the next figure and the arrow is rotated in anticlockwise direction by 90°.

50. **Option (3) is correct.**

All words having the first two letters as AP. Now we will check the third letter which is po and we know that o comes before p so we have two words having o as the same 3rd letter Apostle, Apology. Now check the 4th letter of these two words which are sl and we also know that l comes before s so Apology will be the 1st word.

Apology comes first in the order.

It is followed by Apostle.

Apostle is followed by Apparent.

Apparent is followed by Appear.

Appear is followed by Appetite.

Hence, 4, 3, 2, 1, 5 is the correct answer.

51. **Option (4) is correct.**

Sam Manekshaw was the first Indian army officer to be promoted to the rank of Field Marshal. During the 1971 Indo-Pakistani War, he was the Chief of Staff of the Indian Army. His military career spanned four decades and five wars, beginning with service in the British Indian Army during World War II. He had received the Military Cross for his valor during World War II. Om Prakash Malhotra was the Indian Army's 13th Chief of Army Staff. Gopal Gurunath Bewoor was the Indian Army's ninth Chief of Army Staff.

52. **Option (3) is correct.**

Fat is a nutrient that contains the most energy per gram. One of the three primary macronutrients, along with carbohydrates and proteins, is fat. Because fat molecules are primarily composed of carbon and hydrogen atoms, they are hydrophobic, soluble in organic solvents, and insoluble in water. Fat is an important food for many forms of life, and fats serve both structural and metabolic functions. They are an essential part of the diet of most heterotrophs (including humans), and they are the most energy-dense and thus effective form of energy storage.

53. **Option (2) is correct.**

Kardang Monastery is located in Himachal Pradesh. It is a well-known Drukpa Lineage monastery and the most important monastery in India's Lahaul Valley. Kardang, a nearby village, was once the capital of Lahaul. It is situated at an altitude of 3,500 meters on the left bank of the River Bhaga, facing Keylong City, on a ridge below the Rangcha peak of 15,000 feet (4,572 meters). The monastery has a collection of old books and articles.

54. **Option (3) is correct.**

Maharashtra has the second-highest population after Uttar Pradesh as per Census 2011. Maharashtra is a second most populous state of India with 112,374,333 people with a growth rate of 9.42 percent. Maharashtra is the second most populated state in India as well as the third-most populous country subdivision in the world. As of 2011, Uttar Pradesh is the most populous state and Sikkim is the least populous state in India.

55. **Option (1) is correct.**

Arteries are the blood vessels that transport blood from the heart to various parts of the body. The main artery is the aorta, which is the main high-pressure duct connecting the heart's left ventricle. Capillaries and arterioles are the names given to the smaller branches of the arteries. Veins are blood vessels that transport blood to the heart. The septum is the cartilage that divides the heart into the right and left chambers, preventing blood from mixing.

56. **Option (1) is correct.**

The Archimedes principle underpins the lactometer (used to determine the purity of a sample of milk) and the hydrometer (used to determine the density of liquids). The density of milk is used by the lactometer to determine the purity of milk. The density of the substance is used by the hydrometer and lactometer. The hydrometer is made up of a weighted, sealed, long-necked glass bulb immersed in the measured liquid; the flotation depth indicates the density of the liquid, and the neck can be calibrated to read the actual gravity value.

57. **Option (1) is correct.**

Diksha Dagar, a female golfer, has become the country's youngest winner of a Ladies European Tour (LET) title. She was a member of the Indian delegation at the 2017 Summer Deaflympics, where she won a silver medal in the individual women's golf event and became the first Indian to win a Deaflympic medal in golf. She was the first Indian woman to win the South African Women's Open and the second Indian woman overall to win the Ladies European Tour title. Aditi Ashok is an Indian professional golfer who competed in the 2016 Summer Olympics and currently competes on the Ladies European Tour and the LPGA Tour. Amandeep Drall is a female golfer as well.

58. **Option (1) is correct.**

Indira Jaising is NOT one of the three Indians named to Time's list of the 100 most influential people in 2019. She is an Indian lawyer well-known for her legal work on human rights issues. She was ranked 20th on Fortune magazine's list of the 50 World's Greatest Leaders in 2018. Arundhati Katju was named one of Time Magazine's 100 Most Influential People in April 2019, alongside Menaka Guruswamy, Xi Jinping, Nancy Pelosi, and Hasan Minaj.

59. **Option (2) is correct.**

Sindh, Pakistan, is the location of the ancient civilization of Mohenjo Daro. It was one of the largest towns of the ancient Indus Valley Civilisation, as well as one of the world's oldest major cities. It is located in Sindh's Larkana District (west of the Indus River). It was discovered in 1922 by R.D. Banerji, an Archaeological Survey of India officer. Mohenjo-Daro means 'Mound of the dead'. The site's modern name has been interpreted as "Mound of the Dead Men" in Sindhi. Dholavira is found in Gujarat. It was divided into three sections, as opposed to other sites that only had two. Aside from the lower town, there is a middle town. Lothal It has a man-made Brick dockyard. It contains evidence of the earliest rice cultivation. It functioned as a seaport for the Indus Valley People. Mohenjodaro translates as "death mound" in Sindhi. It is the most populous of the Indus cities. The Great Bath can also be found here. A bronze dancing girl and a seal with the image of Pashupati can also be found here.

60. **Option (1) is correct.**
The minimum amount that can be remitted via Real Time Gross Settlement is ₹ 2,00,000. (RTGS). The acronym "RTGS" stands for Real-Time Gross Settlement, which can be defined as a mechanism that settles fund transfers continuously and in real-time, on a transaction basis (without netting). "Real-Time" refers to the delivery of instructions at the time of receipt; "Gross Settlement" refers to the separate settlement of instructions for the transfer of funds. The RTGS system is specifically designed for high-value transactions. The minimum amount that can be transferred via RTGS is ₹ 2,00,000/-, with no upper or lower limit.
61. **Option (4) is correct.**
Guru Angad was a Sikh Guru who created the Gurmukhi script for writing Punjabi. He is the second Sikh guru after the founder of Sikhism, Guru Nanak. He began the process of collecting Guru Nanak's hymns and added 62 of his own. He chose Amar Das, a Vaishnava Hindu and the third Guru of Sikhism, as his successor. The fourth Sikh Guru was Guru Ram Das. Guru Hargobind was Sikhism's sixth Nanak (Sixth Sikh Guru). Guru Tegh Bahadur was the ninth Guru of the Sikhs.
62. **Option (2) is correct.**
The book "What Happened?" was written by Hillary Clinton. This is about Hillary Clinton's experiences in the 2016 election as the Democratic Party's nominee and general election candidate for President of the United States. It is her seventh book with Simon & Schuster, and it was released on September 12, 2017. She was the first lady of the United States from 1993 to 2001, a senator from New York from 2001 to 2009, and the 67th Secretary of State of the United States from 2009 to 2013. She was the first woman to win the popular vote in a US presidential election, but she was defeated by Donald Trump.
63. **Option (4) is correct.**
During India's Freedom Movement in 1932, James Ramsay MacDonald announced the Communal Award. From 1929 to 1935, he served as Prime Minister of the United Kingdom. He was the first member of the Labour Party to be elected Prime Minister. On 16 August 1932, he presented the Communal Award, which established separate electorates in India for the Forward Caste, Scheduled Caste, Hindus, Buddhists, Sikhs, Indian Christians, Anglo-Indians, Europeans, and Depressed Classes (now known as the Scheduled Caste), among others. He considered himself a friend of the Indians. From 1908 to 1916, Herbert Henry Asquith served as Prime Minister of the United Kingdom. Andrew Bonar Law served as Prime Minister of the United Kingdom from 1922 to 1923. From 1916 to 1922, David Lloyd George served as Prime Minister of the United Kingdom.
64. **Option (2) is correct.**
Stamen is the male part which is divided into two parts— anther and filament. All others are female parts of a flower.
65. **Option (4) is correct.**
The President appoints the Finance Commission at the end of every fifth year. In 1951, the President of India established the Finance Commission under Article 280 of the Indian Constitution. It was established to define the financial relationships between individual state governments and the Indian central government. Furthermore, the Finance Commission Act of 1951 specifies the qualifications, appointment and disqualification, terms, eligibility, and powers of the Finance Commission. The Commission, which consists of a chairman and four other members, is appointed every five years.
66. **Option (2) is correct.**
Laughing gas is another name for nitrous oxide. Nitrous oxide has the chemical formula N_2O . At room temperature, it is a colorless, non-flammable gas with a faint metallic odor and taste. At high temperatures, it is a powerful oxidizer, similar to molecular oxygen. It has important medical applications due to its anesthetic and pain-relieving properties, particularly in surgery and dentistry. The name "Laughing Gas" is coined by Humphry Davy. Nitrogen oxides are a poisonous, highly reactive gas family. These gases are produced when high-temperature fuel is burned. Automobiles, trucks, and other non-road vehicles emit NO_x pollution (e.g., construction equipment, boats, etc.)
67. **Option (3) is correct.**
Under Article 75 of the Indian Constitution, the President appoints the Prime Minister and other Ministers of the Indian Union. Part V of the Constitution (Union) addresses the President, Vice-President, and the Council of Ministers (COM), which is led by the Prime Minister and the Attorney General. According to Article 75, the Prime Minister is appointed by the President, and the other Ministers are appointed by the President on the Prime Minister's recommendation. The total number of ministers, including the Prime Minister, in the Council of Ministers, shall not exceed 15% of the total number of members of the People's House. The ministers will serve at the pleasure of the President.
68. **Option (2) is correct.**
According to the 2011 Census, Haryana has the lowest sex ratio or the number of females per 1000 males. A sex ratio is a useful tool for determining the female population in India and the gender ratio in India. According to the 2011 Population Census, the Indian population ratio is 940 females for every 1000 males. Haryana has the lowest sex ratio in India, with 877 females for every 1000 males. Puducherry and Kerala, where women outnumber men. Kerala has the highest sex ratio in India, with 1084 females for every 1000 males.
69. **Option (3) is correct.**
From the given options, Lionel Messi won the award with 52 scoring points. The selection criteria for the men's players of the year was: respective achievements during the period from 8th August 2021 to 18th December 2022.
70. **Option (2) is correct.**
August Wilhelm Eichler is credited with developing one of the first widely used natural plant classification systems. He was a German botanist who created a new plant classification system to reflect the concept of evolution. The Eichler System classified plant species as non-floral (Cryptogamae) or floral (Phanerogamae). Joseph Banks was a botanist and natural science patron. Joseph Dalton Hooker was the father of geographic botany. Robert Brown was a botanist who made significant contributions to plant taxonomy.
71. **Option (1) is correct.**
Lord Ripon was the British Viceroy of India at the time of the passage of the Ilbert Bill in 1884. Sir Courtenay Ilbert wrote the Ilbert Act, which was introduced in 1883 during the Marquess of Ripon's Viceroyship. On January 25, 1884, the bill was enacted as the Criminal Procedure Code Amendment Act 1884. From 1880 to 1884, Lord Ripon (George Robinson) served as the Viceroy of India

and the Governor-General of India. During his time in India, Ripon proposed legislation that would have given native Indians more legal rights, including the right of Indian judges to try Europeans in court. Lord Dufferin was governor-general of India and viceroy from 1884 to 1888. From 1872 to 1876, Lord Northbrook served as the Viceroy of India. Lord Napier served as Viceroy of India for five months in 1872.

72. Option (4) is correct.

The correct answer is the Pacific Ocean, as Fiji is an island in the Pacific Ocean. The Pacific Ocean is the world's largest and deepest ocean. It stretches from the north Arctic Ocean to the south Southern Ocean and is bounded on the west by the Asian and Australian continents and on the east by the Americas. The Indian Ocean is the world's third-largest ocean. The Arctic Ocean is the world's smallest and shallowest ocean. The Atlantic Ocean is the world's second-largest ocean. The Atlantic Ocean is shaped like an S and serves as the busiest trade route.

73. Option (3) is correct.

According to the Union Budget 2019-20, the Indian economy is the third-largest in the world in terms of Purchasing Power Parity (PPP). PPP is an economic theory that compares the currencies of different countries using a "basket of goods" approach. Finance Minister Nirmala Sitharaman presented India's Union Budget for 2019-2020 on July 5, 2019. The government announces it on the first of February so that it can take effect before the start of the new fiscal year in April. The budget presented in the Finance and Appropriation bills must be passed by Lok Sabha before it can take effect on April 1st, the start of India's fiscal year. Morarji Desai presented the most budgets, ten in total.

74. Option (4) is correct.

The Mica group represents 34 phyllosilicate minerals that exhibit a layered or platy structure. Andhra Pradesh is the largest producer of mica in India. In Andhra Pradesh, Nellore district produces the best quality mica. The total estimated production in this state in 2013-14 was 7626 tonnes. Rajasthan is the second-largest producer of Mica in India with a production of around 6636 tonnes of Mica in the year 2013-14.

75. Option (2) is correct.

During Aurangzeb's reign, the *Fatwa-i-Alamgiri*, a compilation of Muslim laws, was written. It is a collection of works focusing on sharia statecraft, general ethics, military strategy, economic policy, justice, and punishment that served as the rule and main governing body of the Mughal Empire during the reign of Mughal emperor Muhammad Muhiuddin Aurangzeb Alamgir. The compilation is widely regarded as one of the most well-organized works in Islamic jurisprudence. The collection includes Quranic verses accompanied by Hadith accounts from Sahih al-Bukhari, Sahih Muslim, Sunan Abu Dawood, and at-Jami. Tirmidhi's Aurangzeb was the Mughal emperor's sixth reign.

76. Option (4) is correct.

In terms of water inflows and river basin area, the Krishna River ranks fourth in India after the Ganga, Godavari, and Brahmaputra. Mahabaleshwar is a historic site as well as a village in Mahabaleshwar, a district of Satara in the Indian state of Maharashtra. It is a major source of irrigation for Maharashtra, Karnataka, Telangana, and Andhra Pradesh. The Krishna River rises in the Western Ghats near Mahabaleshwar, in the central Indian state of Maharashtra, at an elevation of about 1,300 feet.

77. Option (1) is correct.

Anilkumar Manibhai Naik has been awarded the Padma Vibhushan in the category of 'Trade and Industry-Infrastructure' for 2019. He is an Indian industrialist and philanthropist who serves as the group chairman of the Indian engineering conglomerate Larsen & Toubro Limited and, as of 2018, the chairman of the National Skill Development Corporation. He received the Padma Bhushan, India's third-highest civilian award, in 2009. He also received the "Economic Times-Business Leader" Award for 2008. He is Denmark's Honorary Consul General. On January 25, 2019, President Ram Nath Kovind bestowed the Padma Award, one of the highest civilian honors, on 112 people from various disciplines. Padma Vibhushan, Padma Bhushan, and Padma Shri were the three categories of awards. There are four Padma Vibhushan awardees, fourteen Padma Bhushan awardees, and 94 Padma Shri awardees on the list. Twenty-one of the awardees are female.

78. Option (1) is correct.

The flute is associated with musician Sikkil Mala Chandrashekar. The Sahara family honored Sikkil Mala Chandrasekhar's flute with a lifetime achievement award. The flute is one of India's oldest musical instruments, made of bamboo. Saraswati Veena is a plucked string instrument from India. The instrument is named after the Hindu goddess Saraswati, who has usually depicted holding or playing it. The Saraswati Veena is the most important solo instrument in Carnatic classical music. The late Dhanammal, who became famous as Veena, was a solo Veena star. Dhanammal because of the instrument's mystery Shehnai is a South Asian musical instrument that is typically heard at weddings and other ceremonies. Bismillah Khan, who introduced the Shehnai to the concert stage, is one of the most well-known performers of the instrument. It is made of wood and has a double reed on one end and a metal or wooden flared BEL on the other. Sitar is a lute-family instrument popular in Northern India, Pakistan, and Bangladesh. Sitar was created in the 16th or 17th centuries during the Medieval period. The Sitar is made up of a hemispherical base made of dried and hollowed Tuba and a half-round wood frame. The fret count on the Dandi ranges from 16 to 24.

79. Option (2) is correct.

Vindhyashakti established the Vakataka dynasty in the third century. The Vakataka Empire was an Indian subcontinent dynasty that ruled from the Deccan beginning in the mid-3rd century CE. It belonged to a Brahmin dynasty. The Vakatakas were noted as patrons of the arts, architecture, and literature. The rock-cut Buddhist viharas and chaityas of Ajanta Caves (a UNESCO World Heritage Site) were built under the patronage of emperor Vakataka, Harishena. Nagabhata I was an Indian king who established the imperial Gurjara Pratihara dynasty.

80. Option (1) is correct.

The Insurance Regulatory and Development Authority of India (IRDAI) has its headquarters in Hyderabad. India's Insurance Regulatory and Development Authority (IRDAI): It was formed in 1999 by the recommendations of the Malhotra Committee report. It is a self-contained entity. It is in charge of regulating and developing the insurance industry. In April 2000, the IRDA was established as a statutory body. Objective: Increase customer satisfaction through increased consumer choice and lower premiums while

ensuring the insurance market's financial security. In the country today, there are 34 general insurance companies and 24 life insurance companies. Shimla Central Potato Research Institute is located in Shimla. Himalayan Forest Research Institute is an acronym for Himalayan Forest Research Institute. The Central Glass and Ceramic Research Institute in Kolkata. The Indian Institute of Chemical Biology is a research institute in India. Central Scientific Instruments Organization in Chandigarh. Hyderabad Cellular and Molecular Biology Centre. National Institute of Geophysical Research.

81. Option (2) is correct.

Bharatanatyam is a classical dance style that originated in the South Indian state of Tamil Nadu, making it popular throughout India and around the world. She received the Padma Bhushan in 1957 and the Padma Vibhushan in 1977. In 1981, she was awarded the Sangeetha Kalasikhamani Award by The Indian Fine Arts Society in Chennai. She was the only non-western dancer included in "The Irreplaceable Treasures of Dance in America: The First 100," a Dance Heritage Coalition compilation (2000). Satyajit Ray, a Bengali film director, created the documentary film *Balasaraswati* (1976).

82. Option (4) is correct.

Sarhul is a popular festival observed by various tribes in Jharkhand. Jharkhand's Munda, Oraon, Ho, and other tribes celebrate the tribal New Year during this festival. The Sarhul festival, one of the most popular tribal festivals celebrated throughout the Jharkhand region, marks the start of the New Year. It is observed by the Oraon, Munda, and Ho tribes of the Jharkhand region. Celebrated every year in the first month of the Hindu calendar, on the third day of the moon or the fortnight of 'Chaitra', Sarhul marks the advent of the spring season or "Phaagun" and is celebrated till June or "Jeth". Sarhul means tree worship. Because these tribes are close to nature, they begin the Sarhul festival by worshipping trees and other natural elements.

83. Option (1) is correct.

A node is part of the stem where a leaf emerges. The leaves grow in areas of the plant known as plant nodes, which is where the leaves are attached. The internode is the space between two nodes in a plant. Nodes are the sections of the plant from which buds, twigs, and leaves grow. Because it is a wood stain, the node in the stem is easily identified.

84. Option (2) is correct.

The minimum monthly pension allowed under the Atal Pension Yojana is ₹ 1000. The Atal Pension Yojana (APY) is a government-guaranteed pension scheme managed by the Pension Fund's Regulatory and Development Authority (PFRDA). Subscribers to the Atal Pension Yojana receive a minimum guaranteed pension based on their contributions. The Atal Pension Yojana fund, a pension scheme aimed specifically at the unorganized sector, is also eligible for income tax breaks. The number of subscribers to the Atal Pension Yojana has already surpassed one million.

85. Option (1) is correct.

The small intestine is a part of the human digestive system that completes food digestion. It is a gastrointestinal organ where the majority of nutrient and mineral absorption from food occurs. It is located between the stomach and the large intestine and absorbs bile and pancreatic juice through the pancreatic duct to aid digestion. The small intestine is divided into three sections: the duodenum, the jejunum, and the ileum. The large intestine is the final component of

the gastrointestinal tract and the vertebrate digestive system. In humans, the large intestine begins in the right iliac region of the pelvis, just below the waist.

86. Option (1) is correct.

On receipt of a report from a state's governor, the President may declare a state of emergency under Article 356. If a state government is unable to function under constitutional provisions, the central government may take direct control of the state machinery under Article 356 of the Indian Constitution. Following that, executive authority is exercised by the constitutionally appointed governor, who has the authority to appoint other administrators to assist them. A properly functioning state government is led by an elected Council of Ministers. The state's legislative assembly holds the elected Council of Ministers accountable (Vidhan Sabha).

87. Option (3) is correct.

A criminal proceeding against the Governor cannot be instituted in a court during his term of office, according to Article 361 of the Indian Constitution. While in office, the President or Governor is not personally liable to any court for the exercise and execution of their powers. Article 361 states unequivocally that any court, tribunal, or entity appointed or appointed by any House of Parliament to investigate a complaint under Article 61 may investigate the President's conduct. During the President's or Governor's term of office, no criminal proceedings can be initiated or continued in any court. No court has the authority to issue arrest warrants for the President or the Governor. Civil proceedings against a Governor or President for actions taken in his capacity can only be initiated with two months' notice.

88. Option (2) is correct.

The highest peak in the Satpura range is Dhupgarh. It is the highest point in Madhya Pradesh's Mahadeo Hills. It is 1,352 meters above sea level (4,429 ft). The Satpura range rises east through Maharashtra and Madhya Pradesh, reaching Chhattisgarh in eastern Gujarat state. The Amarkantak region is a special natural heritage area that connects the Vindhya and Satpura Ranges. Mount Dhupgarh, also known as Dhoopgarh, is the highest point in Madhya Pradesh, India's Mahadeo Hills (Satpura Range). Pachmarhi is in the district of Hoshangabad. The top of the hill is a popular spot for viewing sunsets. The Pachmarhi Hill Station is close to the peak.

89. Option (4) is correct.

Deepak Punia was ranked world number one in the 86 kg category in the International Wrestling Federation's September 2019 rankings. He is an Indian freestyle wrestler who won silver in the freestyle 86 kg category at the 2019 World Wrestling Championships and qualified for the Summer Olympics in 2020. He is the first Indian to win a Junior World Championship title in 18 years. Bajrang Punia is a freestyle wrestler from India. Rahul Aware is an Indian freestyle wrestler who competes in the 57 kg weight class. Ravi Dahiya is a freestyle wrestler from India who won bronze at the World Wrestling Championship.

90. Option (1) is correct.

Fibre can be obtained from a variety of sources. Natural Fibre: Natural fibers are fibers derived from plants, animals, or minerals. Cotton, silk, and wool are a few examples. Synthetic fibers: Synthetic fibers are man-made polymers used to create fabric. Polymers are formed when many small units are chemically joined together. Silk, acrylic, rayon, and dacron are a few examples. Silk, cotton, and jute are all natural fibers.

Acrylic is a man-made synthetic fiber, not a natural fibre.

91. Option (2) is correct.

An object's weight on the moon is one-sixth of its weight on Earth. (mass) = weight (acceleration due to gravity of planet) On the earth's surface $mg = \text{mass}$ On the Moon's surface $\text{Weight} = mg / 6$ Acceleration due to Moon gravity = (Earth gravity acceleration)/6 Weight on the moon = 1/6 of the weight on Earth. The mass of the moon is less than that of the Earth. As a result, the moon has a lower force of attraction on objects. As a result, the weight of an object on the moon is one-sixth of its weight on Earth.

92. Option (2) is correct.

India leads the ICC World Test Championship table as of October 2019. It began with the first Test of the 2019 Ashes series on 1 August 2019 and will conclude with a final at Lord's in England in June 2021. This includes nine of the twelve competing nations, each of which is playing a Test series against six of the other eight. Each team will face six other teams, three at home and three away. In this championship, Marnus Labuschagne has the most runs (1249), while Pat Cummins has the most wickets (49).

93. Option (3) is correct.

The entire contents of a living cell, including the cytoplasm and nucleus, are referred to as protoplasm. Protoplasm is the living portion of a cell that is surrounded by a plasma membrane. It is made up of small molecules such as ions, amino acids, monosaccharides, and water, as well as macromolecules such as nucleic acids, proteins, lipids, and polysaccharides. Protoplasm was thought to exist in two states: liquid sol and gel-like jelly. The mitochondrion is a double-membrane-bound organelle found in the majority of eukaryotic organisms. A lysosome is a membrane-bound cell organelle that contains digestive enzymes.

94. Option (1) is correct.

After the first general election the first Lok Sabha constituted on 17th April 1952. The first session was held on 13th May 1952. Ganesh Vasudev Mavalankar was the first speaker of Lok Sabha.

95. Option (1) is correct.

The masseter muscle, which is located in the jaw, is the body's strongest muscle (in terms of weight). The masseter muscle is a facial muscle that aids in the chewing of solid foods. It is a facial muscle that aids in the chewing of solid foods. The muscle is parallelogram-shaped, and it connects to the mandible (lower jawbone) and the cheekbone. During the entire muscle's bilateral contraction, the function is to lift the mandible and raise the lower jaw. When the jaws are closed, the mandible is elevated. The masseter muscle is the most visible masticatory muscle because it is the most superficial and one of the strongest.

96. Option (4) is correct.

Dadabhai Naroji, also known as India's Grand Old Man, was a Parsi intellectual, educator, cotton trader, and early Indian political and social leader. Dadabhai Naroji served three terms as President of the Indian National Congress (INC). He presided over its (INC) second session in Kolkata (then Calcutta) in 1886, the second time he became the president of the Indian National Congress (INC) in Lahore in 1893, and finally in Kolkata in 1906. He is widely referred to as "The Grand Old Man of India" for his hard work to attain "Swaraj". Extra information: Subhas Chandra Bose: Subhas Chandra Bose initiated the 'Jai Hind' greeting. Netaji Subhas Chandra Bose founded the Forward Bloc of the Indian National Congress on June 22, 1939, after resigning from the presidency of the Indian National Congress on April 29, 1939, after being outmanoeuvred

by Mohandas K. Gandhi. The party's first president and vice-president were Subhash Chandra Bose and Sardul Singh Kavishar, respectively. From June 20-22, 1940, it held its first conference in Nagpur, demanding complete independence for India. It even had its newspaper, Forward Bloc. Bal Gangadhar Tilak (or Lokmanya Tilak) was an Indian nationalist, teacher, social reformer, lawyer, and independence activist who was born Keshav Gangadhar Tilak. He was the first Indian Independence Movement leader. He was dubbed "the father of Indian unrest" by British colonial authorities. "Swaraj is my birthright, and I will have it," he added. C.R Das: C R Das is referred to as 'Deshbandhu'. Chittaranjan Das was an Indian politician who founded the Swaraj Party in British-ruled Bengal.

97. Option (1) is correct.

Yashasvi Jaiswal became the world's youngest player to score a double century in 50-over cricket, including List A and ODIs, in 2019. He is currently a member of the India U-19 cricket team. Rajasthan Royals signed him for 2.4 crores (US\$ 340,000) to play in the IPL 2020. Shubman Gill is a cricketer from India. Prithvi Shaw is a former captain of the Indian U-19 team and a current member of the Indian team. Abbas Ali Baig is a retired Indian cricketer.

98. Option (4) is correct.

Article 312 considers the Indian Administrative Service and the Indian Police Service to be services created by Parliament. The Civil Services are the career bureaucrats who serve as the permanent executive branch of the Republic of India. Article 312 of the constitution gives the Rajya Sabha (the Parliament's upper house) the authority to establish new branches of All India Services with a two-thirds majority vote. Article 301 of the Indian Constitution states that "freedom of trade, commerce, and intercourse" is guaranteed. The Indian Penal Code under Article 307. Article 292 of the Constitution of India about "Borrowing by the Government of India".

99. Option (1) is correct.

Sourav Ganguly was elected unopposed as BCCI President in 2019. He was a former Indian cricketer and captain of the Indian team. He was the Chairman of the Bengal Cricket Association, India's governing body for cricket, before being elected President of the BCCI. Sunil Gavaskar is a former Indian international cricketer who represented the Bombay cricket team and the Indian national team between the early 1970s and the late 1980s. Dilip Vengsarkar is a former cricketer and administrator. Sachin Tendulkar is a former Indian international cricketer and former captain of the Indian national team.

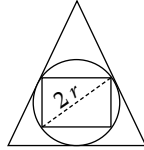

100. Option (1) is correct.

According to the Ministry of Statistics and Programme Implementation, Goa has the highest per capita income in the country as of September 2019. Goa has the highest per capita revenue among the 33 Indian states and union territories. Delhi has India's second-richest economy. North East Sikkim is ranked third, followed by Chandigarh and Haryana. All of the top four states and territories have populations of less than 20 million people. In the fifth richest country, the population is less than 3 crore. All five South Indian states have higher per capita GDPs than India as a whole. Goa is also known as the Orient's Pearl.

101. Option (3) is correct.

Side of equilateral triangle, $a = 24$ cm

$$\therefore \text{In-radius of equilateral triangle} = \frac{a}{2\sqrt{3}}$$

$$\text{So, in-radius, } r = \frac{24}{2\sqrt{3}} = \frac{12}{\sqrt{3}} = 4\sqrt{3} \text{ cm}$$

Now, diameter of in-circle will be diameter of square.

$$\Rightarrow \text{diagonal} = 2r = 8\sqrt{3} \text{ cm}$$

$$\text{Side of square, } s = \frac{\text{diagonal}}{\sqrt{2}} = \frac{8\sqrt{3}}{\sqrt{2}} = 4\sqrt{6} \text{ cm}$$

$$\text{Now, area of square} = 4\sqrt{6} \times 4\sqrt{6} = 16 \times 16 = 96 \text{ cm}^2$$

102. Option (3) is correct.

From the given histogram,

Number of students who obtained 20 marks or more but less than 60 = 78 + 110 + 142 + 150 = 480

103. Option (4) is correct.

Given numbers are 3738, 5659, and 9501

\therefore Remainder is same in each case. So, there differences will be divisible by a common number.

$$D_1 = 5659 - 3738 = 1921$$

$$D_2 = 9501 - 5659 = 3842$$

$$D_3 = 9501 - 3738 = 5763$$

Now, HCF of 1921, 3842, and 5763 is 1921

$$\therefore 1921 = 1 \times 1921$$

$$3842 = 2 \times 1921$$

$$5763 = 3 \times 1921$$

On dividing 3738, 5659 and 9501 by 1921 we are getting remainder = 1817

$$\Rightarrow x = 1921 \text{ and } y = 1817$$

$$x + y = 1921 + 1817 = 3738$$

104. Option (4) is correct.

A and B fill the tank in 6 hours.

\therefore Part of tank filled by them in 10 hours.

$$= 10 \times \frac{1}{6} = \frac{5}{3} \text{ th}$$

C can empty the full tank in 24 hours

Therefore, C can empty the $\frac{5}{3}$ th tank in $\frac{5/3}{1/24}$

$$= \frac{5 \times 24}{3} \text{ hours} = 15 \text{ hours}$$

105. Option (1) is correct.

Let the sum is = ₹a

$$\therefore \text{S.I in first condition} = \frac{a \times x \times 5}{100}$$

$$\left\{ \begin{array}{l} \text{simple interest, S.I.} = \frac{P \times r \times t}{100} \\ P \rightarrow \text{Principal amount} \\ r \rightarrow \text{rate of interest} \\ t \rightarrow \text{time (in years)} \end{array} \right\}$$

$$\text{Now, S.I. in second condition} = \frac{a \times (x+5) \times 5}{100}$$

According to question

$$\frac{a \times (x+5) \times 5}{100} - \frac{a \times x \times 5}{100} = 9200$$

$$\Rightarrow \frac{a \times 5 \times 5}{100} = 9200 \Rightarrow a = 4 \times 9200 = 36800$$

\therefore Required sum is ₹36800.

106. Option (4) is correct.

Let the cost price, C.I. of article = ₹x

\therefore Profit on selling at ₹1100 = 1100 - x

Also, loss on selling at ₹700 = x - 700

According to question

$$\Rightarrow 1100 - x = 3(x - 700)$$

$$\Rightarrow 1100 - x = 3x - 2100$$

$$\Rightarrow 3200 = 4x \Rightarrow x = \frac{3200}{4} = 800$$

\therefore Cost price of article = ₹800

Selling price, S.P.

$$= \frac{(100 + \text{profit}\%)}{100} \times \text{C.P.}$$

$$= \frac{(100 + 12.5)}{100} \times 800 = \frac{112.5}{100} \times 800 = ₹900$$

107. Option (2) is correct.

Total angle of D and E = 61.2° + 118.8° = 180°

Total angle of B and C = 64.8° + 79.2° = 144°

\therefore Required percentage

$$= \frac{180^\circ - 144^\circ}{144^\circ} \times 100 = 25\%$$

108. Option (2) is correct.

$$x^2 + xy + y^2 = \frac{3}{16}$$

$$\Rightarrow x^2 + y^2 = \frac{3}{16} - xy \quad \dots(i)$$

$$\text{Now, } x^4 + x^2y^2 + y^4 - x^2y^2 = \frac{21}{256}$$

$$\Rightarrow (x^2 + y^2)^2 - x^2y^2 = \frac{21}{256}$$

$$\Rightarrow \left(\frac{3}{16} - xy\right)^2 - x^2y^2 = \frac{21}{256} \quad [\text{from equation (i)}]$$

$$\Rightarrow \frac{9}{256} + x^2y^2 - \frac{3}{8}xy - x^2y^2 = \frac{21}{256}$$

$$\Rightarrow -\frac{3}{8}xy = \frac{21}{256} - \frac{9}{256} = \frac{12}{256} = \frac{3}{64} \Rightarrow xy = -\frac{1}{8} \quad \dots(ii)$$

$$x^2 + y^2 = \frac{3}{16} - xy = \frac{3}{16} - \left(-\frac{1}{8}\right)$$

[using equation (ii)]

$$= \frac{3}{16} + \frac{1}{8} = \frac{5}{8}$$

$$\text{So, } 2(x^2 + y^2) = 2 \times \left(\frac{5}{8}\right) = \frac{5}{4}$$

109. Option (3) is correct.

Give that, 2 sin θ + 15 cos² θ = 7

$$\Rightarrow 2 \sin \theta + 15[1 - \sin^2 \theta] = 7 \quad [\because \cos^2 \theta = 1 - \sin^2 \theta]$$

$$\Rightarrow -15 \sin^2 \theta + 2 \sin \theta + 15 = 7$$

$$\Rightarrow 15 \sin^2 \theta - 2 \sin \theta - 8 = 0$$

$$\Rightarrow 15 \sin^2 \theta - 12 \sin \theta + 10 \sin \theta - 8 = 0$$

$$\Rightarrow 3 \sin \theta [5 \sin \theta - 4] + 2 [5 \sin \theta - 4] = 0$$

$$\Rightarrow (3 \sin \theta + 2) (5 \sin \theta - 4) = 0$$

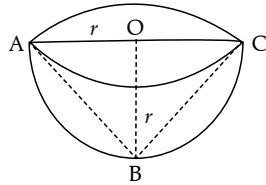

$$\Rightarrow \sin \theta = \frac{4}{5} \text{ or } \sin \theta = -\frac{2}{3}$$

[It is not possible as 0° < θ < 90°]

$$\begin{aligned} \therefore \sin \theta &= \frac{4}{5} \\ \Rightarrow \tan \theta &= \frac{\sin \theta}{\sqrt{1 - \sin^2 \theta}} = \frac{\frac{4}{5}}{\sqrt{1 - \frac{16}{25}}} = \frac{\frac{4}{5}}{\frac{3}{5}} = \frac{4}{3} \\ \frac{3 - \tan \theta}{2 + \tan \theta} &= \frac{3 - \frac{4}{3}}{2 + \frac{4}{3}} = \frac{9 - 4}{6 + 4} = \frac{5}{10} = \frac{1}{2} \end{aligned}$$

110. Option (1) is correct.

Let the radius of hemisphere = r cm
 \therefore radius of required cone = r cm
 and height of cone, $h = r$ cm

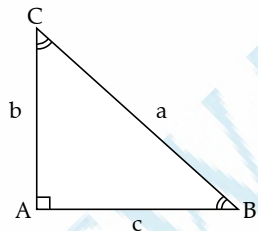

$OA = OC = r$ cm
 $OB = r$ cm

$$\begin{aligned} \text{Volume of hemisphere} &= \frac{2}{3} \pi r^3 \\ \text{Volume of cone} &= \frac{1}{3} \pi r^2 h = \frac{1}{3} \pi r^3 \text{ cm}^3 \quad [\because r = h] \\ \text{Volume of remaining part} &= \frac{2}{3} \pi r^3 - \frac{1}{3} \pi r^3 = \frac{1}{3} \pi r^3 \text{ cm}^3 \\ \text{So, required percentage} &= \frac{\frac{1}{3} \pi r^3}{\frac{2}{3} \pi r^3} \times 100 = 50\% \end{aligned}$$

111. Option (3) is correct.

In right angle $\triangle ABC$, $2 \angle B = \angle A$
 $\therefore \angle A$ must be 90° only then above condition will fulfil.
 $\Rightarrow \angle B = 45^\circ$
 Now, $\angle C = 180^\circ - \angle A - \angle B = 180^\circ - 90^\circ - 45^\circ = 45^\circ$

$\therefore \angle B = \angle C$
 $\Rightarrow AC = BC = b = c$... (i)
 [Sides opposite to equal angles are also equal]
 In right $\triangle ABC$

$$\begin{aligned} a^2 &= b^2 + c^2 \quad (\text{By Pythagoras theorem}) \\ a^2 &= b^2 + c \cdot c = b^2 + b \cdot c \quad [\text{using eqn. (i)}] \end{aligned}$$

112. Option (3) is correct.

We know that, sum of numbers = Average \times number of numbers
 \therefore Average of 11 numbers = 68
 \Rightarrow Sum of 11 numbers = $68 \times 11 = 748$
 Average of first 4 numbers = 78
 \Rightarrow Sum of first 4 numbers = $78 \times 4 = 312$
 Average of next 4 numbers = 63
 \Rightarrow Sum of next 4 numbers = $63 \times 4 = 252$
 Let 11th number = x
 \Rightarrow 9th number = $2x$

and 10th number = $x - 4$

According to question
 $748 = 312 + 252 + x + 2x + x - 4$
 $\Rightarrow 188 = 4x \Rightarrow x = 47$
 \therefore 9th number = $2 \times 47 = 94$
 11th number = 47
 Average of 9th and 11th number = $(94 + 47) \div 2$
 $= \frac{141}{2} = 70.5$

113. Option (2) is correct.

Let us assume that total number of employees = x
 \therefore Number of female employees = 105
 Percentage of female employees = 70%

$$\begin{aligned} \Rightarrow x &= \frac{100}{70} \times 105 = 150 \\ \text{So, number of male employees} &= 150 - 105 = 45 \\ \text{Number of employees got promotion} &= \frac{40}{100} \times 150 = 60 \\ \text{Number of male employees got promotion} &= 25 \\ \therefore \text{Number of promoted female employees} &= 60 - 25 = 35 \\ \% \text{ of female employees got promotion} &= \frac{35}{105} \times 100 = 33\frac{1}{3}\% \end{aligned}$$

114. Option (2) is correct.

Number of total students = 42
 Average score of all students = 69
 \therefore Total marks of all 42 students = $42 \times 69 = 2898$
 Ratio of boys to girls = 10 : 11
 \therefore Number of boys = $\frac{10}{21} \times 42 = 20$
 and number of girls = $\frac{11}{21} \times 42 = 22$

Let average score of girls = 10:11
 \therefore average score of boys = $\frac{6}{5}x$ (20% more than girls)

According to question

$$\begin{aligned} 20 \times \frac{6}{5}x + 22x &= 2898 \\ 24x + 22x &= 2898 \\ \Rightarrow x &= \frac{2898}{46} = 63 \\ \therefore \text{Average score of boys} &= \frac{6}{5} \times 63 = 75.6 \end{aligned}$$

115. Option (2) is correct.

Let us assume that D = 100
 \therefore C (60% more than D) = 160
 B (60% less than C) = $\frac{100 - 60}{100} \times 160$
 $= \frac{40 \times 160}{100} = 64$

A (40% more than B) = $\frac{140}{100} \times 64 = 89.6$

Option-1 : Clearly 60% of 64 \neq 160
 Option-2 : 36% less than D = 64 (which is B)
 Option-3 : 10.4% more than D = 110.4 \neq 89.6 (A)
 Option-4 : 54% less than C = 73.6 \neq 89.6 (A)

116. Option (2) is correct.

For city A : 1.25 times the average sale of Q = $1.25 \times 450 = 562.5 \neq 640$

For city B : 1.25 times the average sale of Q = $1.25 \times 600 = 750 \neq 560$

For city C : 1.25 times the average sale of Q = $1.25 \times 650 = 812.5 \neq 480$

For city D : 1.25 times the average sale of Q = $1.25 \times 600 = 750$

117. Option (4) is correct.

Time/Person	A	B	C
1 st 2 months	112000	0	0
Next 2 months	112000	80000	72000
Next 2 months	112000	80000	72000
Next 2 months	112000	80000	72000
Next 2 months	112000	80000	72000
Last 2 months	112000	72000	64000

Ratio of their profit = Investment of A \times Corresponding time period : Investment of B \times corresponding time period : Investment of C \times Corresponding time period
 $= 112000(2 + 2 + 2 + 2 + 2) : [80000(2 + 2 + 2 + 2) + 72000 \times 2] : [72000(2 + 2 + 2) + 64000 \times 2]$
 $= 112 \times 12 : (80 \times 8 + 72 \times 2) : (72 \times 6 + 64 \times 2)$

[Taking 1000 common]

$= 14 \times 12 : (80 + 9 \times 2) : (54 + 8 \times 2)$ [Taking 8 common]

$= 168 : 98 : 70$ [Taking 2 common]

$= 84 : 49 : 35$

Let us assume total profit is ₹x

$$\Rightarrow \frac{49}{84 + 49 + 35} \times x = 9800 \Rightarrow x = \frac{9800}{49} \times 168 = 33600$$

Total profit = ₹33,600

118. Option (3) is correct.

Given expression is :

$$= \frac{(0.13)^2 + (0.21)^2}{(0.39)^2 + 81(0.07)^2} \div \frac{\left[\frac{(2.4)^4 + 3 \times (11.52) + 9}{(11.52) + 9} \right]}{\left[\frac{(2.4)^6 + 6 \times (2.4)^4 + 3 \times (17.28)}{(11.52) + 9} \right]}$$

$$= \frac{(0.13)^2 + (0.21)^2}{9(0.13)^2 + 9(0.21)^2} \div \frac{\left[\frac{(2.4)^4 + 3 \times (11.52) + 9}{(11.52) + 9} \right]}{(2.4)^2 \left[\frac{(2.4)^4 + 6 \times (2.4)^2 + 3 \times 3}{(11.52) + 9} \right]}$$

$$= \frac{(0.13)^2 + (0.21)^2}{9 \left[(0.13)^2 + (0.21)^2 \right]} \div \frac{\left[\frac{(2.4)^4 + 3 \times (11.52) + 9}{(11.52) + 9} \right]}{(2.4)^2 \left[\frac{(2.4)^4 + 3 \times (11.52) + 9}{(11.52) + 9} \right]}$$

$$= \frac{1}{9} \div \frac{1}{(2.4)^2} = \frac{(2.4)^2}{9} = \frac{5.76}{9} = 0.64$$

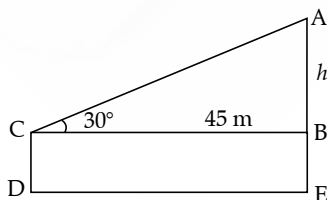

0.64 lies between 0.6 and 0.7

119. Option (4) is correct.

Height of observer = 1.62 m

Distance of observer from pole = 45 m

Let height of pole from observer eye level = h m

AB = h m, CB = 45 m, CD = BE = 1.62 m

In $\triangle ABC$

$$\tan 30^\circ = \frac{AB}{BC} = \frac{h}{45}$$

$$\Rightarrow \frac{1}{\sqrt{3}} = \frac{h}{45}$$

$$\Rightarrow h = 15\sqrt{3} = 15 \times 1.73 = 25.95 \text{ m}$$

$$\therefore \text{Height of pole} = h + 1.62 = 25.95 + 1.62 = 27.57 \approx 27.6 \text{ m} \quad (\text{approx.})$$

120. Option (2) is correct.

Total sales of P in cities B, D, and E

$$= (560 + 750 + 550) \times 1000 = 1860000$$

Total Sales of Q in cities A, C, D and E

$$= (450 + 650 + 680 + 620) \times 1000 = 2400000$$

Required percentage

$$= \left(\frac{2400000 - 1860000}{2400000} \right) \times 100$$

$$= \frac{540}{2400} \times 100 = 22.5\%$$

121. Option (2) is correct.

$$\sqrt{6 - \sqrt{17 - 2\sqrt{72}}} = \sqrt{6 - \sqrt{9 + 8 - 2\sqrt{9 \times 8}}}$$

$$= \sqrt{6 - \sqrt{(\sqrt{9} - \sqrt{8})^2}} \quad [\because a^2 + b^2 - 2ab = (a - b)^2]$$

$$= \sqrt{6 - (\sqrt{9} - \sqrt{8})}$$

$$= \sqrt{6 - 3 + 2\sqrt{2}} \quad [\because \sqrt{8} = 2\sqrt{2}]$$

$$= \sqrt{3 + 2\sqrt{2}}$$

$$= \sqrt{(\sqrt{2})^2 + 1^2 + 2 \times \sqrt{2} \times 1}$$

$$= \sqrt{(\sqrt{2} + 1)^2} \quad [\because a^2 + b^2 + 2ab = (a + b)^2]$$

$$= \sqrt{2} + 1 = 1.414 + 1 = 2.414 \quad [\because \sqrt{2} = 1.414]$$

It is closest to 2.4.

122. Option (3) is correct.

Let us assume C can finish the task alone in 'x' days.

$$\therefore B \text{ takes } \frac{x}{2} \text{ days alone to finish the same task} \quad [\because B \text{ is twice fast than C}]$$

Similarly, A takes $\frac{x}{4}$ days alone to complete same task.

D takes 16 days to finish the same task.

According to question

$$\frac{1}{A} + \frac{1}{B} + \frac{1}{C} + \frac{1}{D} = \frac{1}{4} \quad [1 \text{ day work of each}]$$

$$\frac{1}{x/4} + \frac{1}{x/2} + \frac{1}{x} + \frac{1}{16} = \frac{1}{4}$$

$$\Rightarrow \frac{4}{x} + \frac{2}{x} + \frac{1}{x} = \frac{1}{4} - \frac{1}{16} = \frac{3}{16}$$

$$\Rightarrow \frac{7}{x} = \frac{3}{16}$$

$$\Rightarrow x = \frac{7 \times 16}{3} = \frac{112}{3}$$

∴ A takes $\left[\frac{x'}{4} \text{ days} = \frac{112}{3 \times 4} \text{ days}\right] = \frac{28}{3} \text{ days}$ to finish the task.

∴ 75% of work will be done by A in $\frac{3}{4} \times \frac{28}{3} = \frac{28}{4} = 7 \text{ days}$.

123. Option (2) is correct.

A can finish $\frac{1}{3}$ th of work in 5 days.

⇒ A can finish complete work in $5 \times 3 = 15 \text{ days}$

B can finish $\frac{2}{5}$ th of work in 10 days.

⇒ B can finish complete work in $\frac{5}{2} \times 10 = 25 \text{ days}$

C can finish 75% = $\frac{3}{4}$ th of work in 15 days

⇒ C can finish whole work in $\frac{4}{3} \times 15 = 20 \text{ days}$

6 days work A, B, and C = $6 \left[\frac{1}{15} + \frac{1}{15} + \frac{1}{20} \right]$

$$= 6 \left[\frac{40 + 24 + 30}{600} \right] = \frac{94}{100}$$

$$\text{Remaining work} = 1 - \frac{94}{100} = \frac{6}{100}$$

∴ B can finish $\frac{6}{100}$ th work in $\frac{6/100}{1/25} = \frac{6}{4} = 1\frac{1}{2} \text{ days}$

124. Option (1) is correct.

Let radius of cylinder = $r \text{ cm}$

Height of cylinder, $h = 34 \text{ cm}$

Volume of cylinder = $\pi r^2 h = 5236 \text{ cm}^3$

$$\Rightarrow \pi r^2 h = 5236$$

$$\Rightarrow \frac{22}{7} \times r^2 \times 34 = 5236 \Rightarrow r^2 = 49 \Rightarrow r = 7 \text{ cm}$$

∴ Curved surface area of cylinder = $2\pi rh$

$$= 2 \times \frac{22}{7} \times 7 \times 34 = 44 \times 34 = 1496 \text{ cm}^2$$

125. Option (2) is correct.

We will use BODMAS to solve given expression.

$$8 \div [(9 - 5) \div \{(4 \div 2 \text{ of } 4) - (8 \div 8 \text{ of } 16) + (4 \times 2 \div 8)\}]$$

$$= 8 \div [4 \div \{(4 \div 8) - (8 \div 128) + (4 \times 2 \div 8)\}]$$

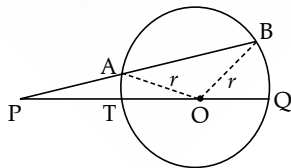

$$= 8 \div [4 \div \left\{ \left(\frac{1}{2}\right) - \left(\frac{1}{16}\right) + (1) \right\}]$$

$$= 8 \div \left[4 \div \left(\frac{1}{2} - \frac{1}{16} + 1 \right) \right]$$

$$= 8 \div \left[4 \div \frac{23}{16} \right] = 8 \div \left(\frac{4 \times 16}{23} \right) = 8 \times \frac{23}{4 \times 16} = \frac{23}{8}$$

126. Option (2) is correct.

As per given information, we will draw figure.

Let us assume radius of circle = $r \text{ cm}$

∴ OP = 26 cm

PA = 18 cm

PB = 32 cm

[Given]

⇒ AB = 32 - 18 = 14 cm

From figure PQ = (26 + r) cm

PT = (26 - r) cm

As per Secant theorem,

$$PT \times PQ = PA \times PB$$

$$\Rightarrow (26 - r)(26 + r) = 18 \times 32$$

$$\Rightarrow 26^2 - r^2 = 576$$

$$\Rightarrow 676 - r^2 = 576$$

$$\Rightarrow r^2 = 100 \Rightarrow r = 10$$

∴ Radius of circle = 10 cm

127. Option (2) is correct.

Radius of conical vessel, $r_1 = 18 \text{ cm}$

Height of conical vessel, $h_1 = 60 \text{ cm}$

Radius of cylindrical vessel, $r_2 = 15 \text{ cm}$

Let height rose of cylindrical vessel = h_2

According to question

Volume of conical vessel = Volume of ware rose in vessel

$$\Rightarrow \frac{1}{3} \pi r_1^2 h_1 = \pi r_2^2 h_2$$

$$\Rightarrow \frac{1}{3} \times 18 \times 18 \times 60 = 15 \times 15 \times h_2$$

$$\Rightarrow h_2 = \frac{18 \times 18 \times 60}{3 \times 15 \times 15} = 28.8 \text{ cm}$$

128. Option (3) is correct.

Marked price of article = ₹800

Cost price of article = ₹540

The first discount is 25%.

Selling price of the article after discount

$$= 800 \times \frac{75}{100} = ₹600$$

Second discount = ₹600 - ₹540 = ₹60

$$\text{Second discount percentage} = \frac{60}{600} \times 100 = 10\%$$

129. Option (3) is correct.

Ratio of boys to girls in school C = 6 : 5

$$\therefore \text{No. of boys in school C} = \frac{6}{11} \times \frac{79.2^\circ}{360^\circ} \times 9000$$

Ratio of boys to girls in school B = 7 : 11

$$\therefore \text{No. of girls in school B} = \frac{11}{18} \times \frac{64.8^\circ}{360^\circ} \times 9000$$

$$\text{Required ratio} = \frac{6}{11} \times \frac{79.2}{360} \times 9000 :$$

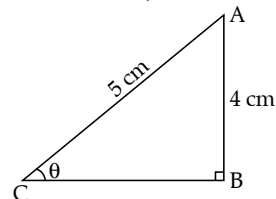

$$\frac{11}{18} \times \frac{64.8^\circ}{360^\circ} \times 9000$$

$$= \frac{6}{11} \times 79.2 : \frac{11}{18} \times 64.8$$

$$= 6 \times 2 : 11 = 12 : 11$$

130. Option (3) is correct.

Given that cosec $\theta = 1.25 = 5/4$

In right triangle ABC

$$BC = \sqrt{AB^2 - AB^2} = \sqrt{5^2 - 4^2}$$

$$= \sqrt{25 - 16} = \sqrt{9} = 3 \text{ cm}$$

$$\frac{4 \tan \theta - 5 \cos \theta + 1}{\sec \theta + 4 \cot \theta - 1} = \frac{4 \times \frac{4}{3} - 5 \times \frac{3}{5} + 1}{\frac{5}{3} + 4 \times \frac{3}{4} - 1}$$

$$\left[\begin{array}{l} \therefore \tan \theta = \frac{P}{B}, \cot \theta = \frac{B}{P} \\ \cos \theta = \frac{B}{H}, \sec \theta = \frac{H}{B} \\ P \rightarrow \text{perpendicular, } B \rightarrow \text{Base} \\ H \rightarrow \text{Hypotneuse} \end{array} \right]$$

$$= \frac{\frac{16}{3} - \frac{15}{5} + 1}{\frac{5}{3} + 3 - 1}$$

$$= \frac{\frac{80 - 45 + 25}{15}}{\frac{5 + 6}{3}} = \frac{50/15}{11/3} = \frac{10/3}{11/3} = 10/11$$

131. Option (1) is correct.

Number of students obtaining 50 marks or more but less than 70 marks = 150 + 120 = 270

Number of students obtaining 70 marks or more but less than 90 marks = 100 + 80 = 180

Total number of girls obtaining 50 marks or more but less than 90 = $\frac{60}{100} \times 270 + \frac{55}{100} \times 180 = 162 + 99 = 261$

132. Option (3) is correct.

Given that : $\frac{8x}{2x^2 + 7x - 2} = 1$

$$\Rightarrow 8x = 2x^2 + 7x - 2$$

$$\Rightarrow 2x^2 - x - 2 = 0$$

$$\Rightarrow 2x^2 - 2 = x$$

$$\Rightarrow 2x - \frac{2}{x} = x$$

$$\Rightarrow x - \frac{1}{x} = \frac{1}{2}$$

$$\therefore \left(x + \frac{1}{x}\right)^2 - \left(x - \frac{1}{x}\right)^2 = 4$$

$$\Rightarrow \left(x + \frac{1}{x}\right)^2 = 4 + \left(x - \frac{1}{x}\right)^2 = 4 + \left(\frac{1}{2}\right)^2$$

$$= 4 + \frac{1}{4} = \frac{17}{4}$$

$$\Rightarrow x + \frac{1}{x} = \sqrt{\frac{17}{4}} = \frac{\sqrt{17}}{2}$$

We know that : $x^3 + \frac{1}{x^3} = \left(x + \frac{1}{x}\right)^3 - 3\left(x + \frac{1}{x}\right)$

$$= \left(\frac{\sqrt{17}}{2}\right)^3 - \frac{3\sqrt{17}}{2} = \frac{17\sqrt{17}}{8} - \frac{3\sqrt{17}}{2}$$

$$= \frac{17\sqrt{17} - 12\sqrt{17}}{8} = \frac{5\sqrt{17}}{8}$$

133. Option (3) is correct.

Let cost price of article = ₹100

Condition-1

Discount = 10%

Profit% = 25%

$$\Rightarrow \text{Selling price, } S.P. = \frac{(100 + 25)}{100} \times 100 = ₹125$$

$$\text{Marked price} = \frac{100}{(100 - \text{discount})} \times S.P.$$

$$= \frac{100}{100 - 10} \times 125 = \frac{100 \times 125}{90} = \frac{1250}{9}$$

Condition-2

Discount% = 25%

Profit% = ?

$$\text{Selling price} = \frac{(100 - 25)}{100} \times \text{Marked price}$$

$$= \frac{75}{100} \times \frac{1250}{9} = \frac{25 \times 125}{30}$$

$$= \frac{5 \times 125}{6} = \frac{625}{6} = ₹104 \frac{1}{6}$$

$$\therefore \text{Profit} = 104 \frac{1}{6} - 100 = 4 \frac{1}{6}$$

$$\Rightarrow \text{Profit\%} = 4 \frac{1}{6}\%$$

134. Option (3) is correct.

Total number of students obtaining less than 50 marks = 45 + 78 + 110 + 142 = 375

Total number of students obtaining 60 marks or more = 120 + 100 + 80 + 55 = 355

Difference of students = 375 - 355 = 20

$$\therefore \text{Required percentage} = \frac{20}{355} \times 100 = 5.6 \quad (\text{approx.})$$

135. Option (4) is correct.

Given that :

Principal money = ₹5000

Amount in 8 years = ₹7200

Time (in years) = 8 years

Rate of interest = r%

$$\therefore A = P \left[1 + \frac{r}{100} \right]^n$$

A → Amount

P → Principal

r → Rate of compound interest

n → No. of time period.

$$\Rightarrow 7200 = 5000 \left[1 + \frac{r}{100} \right]^8$$

$$\Rightarrow \left[1 + \frac{r}{100} \right]^8 = \frac{72}{50}$$

$$\Rightarrow \left[1 + \frac{r}{100} \right]^4 = \frac{6}{5} \quad \dots(i)$$

$$\therefore \text{Compound interest} = P \left[\left[1 + \frac{r}{100} \right]^n - 1 \right]$$

Now, new principal = ₹6550

Time = 4 years

Rate of interest = r% p.a.

$$\Rightarrow \text{Compound interest} = 6550 \left[\left[1 + \frac{r}{100} \right]^4 - 1 \right]$$

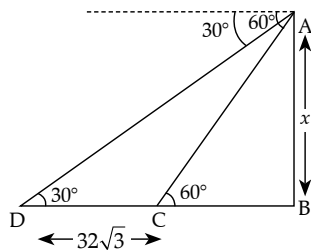

$$= 6550 \left[\frac{6}{5} - 1 \right] = 6550 \times \frac{1}{5} = 1310 \quad [\text{using eqn (i)}]$$

∴ Required compound interest = ₹ 1310

136. Option (2) is correct.

Height of lamp post = x m

Distance between given objects = $32\sqrt{3}$ m

Objects are at point C and D

In $\triangle ABC$

$$\tan 60^\circ = \frac{AB}{BC}$$

$$\Rightarrow \sqrt{3} = \frac{x}{BC}$$

$$\Rightarrow BC = \frac{x}{\sqrt{3}} \quad \dots(i)$$

In $\triangle ADB$

$$\tan 30^\circ = \frac{AB}{BD}$$

$$\Rightarrow \frac{1}{\sqrt{3}} = \frac{x}{BC + 32\sqrt{3}}$$

$$\Rightarrow BC + 32\sqrt{3} = x\sqrt{3}$$

$$\Rightarrow BC = x\sqrt{3} - 32\sqrt{3} \quad \dots(ii)$$

From (i) and (ii)

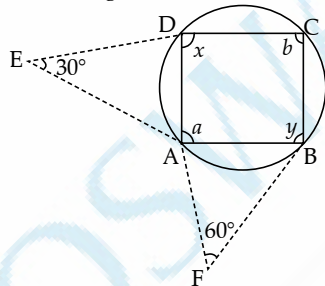

$$x\sqrt{3} - 32\sqrt{3} = \frac{x}{\sqrt{3}}$$

$$\Rightarrow 3x - 96 = x \Rightarrow 2x = 96 \Rightarrow x = 48$$

Therefore, Height of lamp post is 48m.

137. Option (2) is correct.

As per the given, the figure is

Let $\angle DAB = a$, $\angle ABC = y$, $\angle BCD = b$ and $\angle CDA = x$

In $\triangle FDC$

$$60^\circ + x + b = 180^\circ \quad [\text{Angle sum properties}]$$

$$\Rightarrow x + b = 120^\circ \quad \dots(i)$$

In $\triangle ECB$

$$30^\circ + y + b = 180^\circ$$

$$\Rightarrow y + b = 150^\circ \quad \dots(ii)$$

Also, $a + b = 180^\circ$

[Sum of opposite angles of cyclic quadrilateral is 180°]

$$x + y = 180^\circ$$

$$\Rightarrow a + b + x + y = 360^\circ$$

$$\Rightarrow a + y + 120^\circ = 360^\circ \quad [\text{Using eq-(i)}]$$

$$\Rightarrow a + y = 240^\circ$$

$$\Rightarrow y = 240^\circ - a \quad \dots(iii)$$

$$\Rightarrow y = 120^\circ + x + b - a \quad (\text{Using (i)})$$

$$\Rightarrow y = 120^\circ + x + 180^\circ - a - a$$

$$\Rightarrow y = 300^\circ + x - 2a$$

$$\Rightarrow y = 300^\circ - 3y$$

$$\Rightarrow 2y = 150^\circ \Rightarrow y = 75^\circ$$

So, $\angle ABC = 75^\circ$

138. Option (2) is correct.

Total daily sales of P in cities A & $C = (640 + 480) \times 1000 = 1120000$

Total daily sales of Q in cities B & $D = (600 + 680) \times 1000 = 1280000$

$$\therefore \text{Required ratio} = \frac{1120000}{1280000} = \frac{28}{32} = \frac{7}{8} = 7 : 8$$

139. Option (1) is correct.

Let ages of A & B (7 years ago) be $4x$ & $5x$ respectively and ages of A & B (7 year hence) be $5y$ & $6y$ respectively.

$$\Rightarrow \frac{4x + 14}{5x + 14} = \frac{5y}{6y} \Rightarrow \frac{4x + 14}{5x + 14} = \frac{5}{6}$$

$$\Rightarrow 24x + 84 = 25x + 70 \Rightarrow x = 14 \quad \dots(i)$$

∴ Their present ages will be $(4 \times 14 + 7)$ & $(5 \times 14 + 7)$ or 63 & 77 years respectively.

$$\therefore \text{Ratio of their ages after 5 years} = \frac{63 + 5}{77 + 5} = \frac{68}{82}$$

$$= \frac{34}{41} = 34 : 41$$

140. Option (3) is correct.

Pipe A can empty the tank in 6 hours.

Pipe B can empty the tank in 16 hours.

Let C can fill the tank in x hours.

$$\text{All can empty full tank in } \frac{18}{5} \times 80 = 288 \text{ m}$$

$$\text{or } \frac{288}{60} \text{ hours} = \frac{24}{5} \text{ hours}$$

According to question

$$\Rightarrow \frac{1}{6} + \frac{1}{16} - \frac{1}{x} = \frac{1}{24/5}$$

[Since together they will empty the tank]

$$\Rightarrow \frac{1}{6} + \frac{1}{16} - \frac{5}{24} = \frac{1}{x} \Rightarrow \frac{8 + 3 - 10}{48} = \frac{1}{x}$$

$$\Rightarrow \frac{11 - 10}{48} = \frac{1}{x} \Rightarrow x = 48$$

∴ C can fill the tank in 48 hours alone.

141. Option (2) is correct.

First we will find the LCM of 4, 5, 6, 7, 8 & 12.

2	4, 5, 6, 7, 8, 12
2	2, 5, 3, 7, 4, 6
2	1, 5, 3, 7, 2, 3
3	1, 5, 3, 7, 1, 3
5	1, 5, 1, 7, 1, 1
7	1, 1, 1, 7, 1, 1
	1, 1, 1, 1, 1, 1

So, LCM = $2 \times 2 \times 2 \times 3 \times 5 \times 7 = 840$

Required number will be in form of $(840x + 2)$ and divisible by 13.

On dividing $(840x + 2)$ by 13

Quotient = $64x$ and remainder = $8x + 2$

Put $x = 1, 2, 3, 4, \dots$

On putting $x = 3$

Remainder = 26

Now, $840x + 2 = 840 \times 3 + 2$

= $2520 + 2 = 2522$

Sum of digits of 2522 = $2 + 5 + 2 + 2 = 11$

142. Option (1) is correct.

We will use BODMAS to solve this

$$\begin{aligned} & \left(3\frac{1}{3} - 2\frac{1}{2} \right) \div \frac{1}{4} \text{ of } 1\frac{1}{4} \text{ of } \frac{4}{15} \div \frac{1}{3} \div \frac{1}{3} \text{ of } \frac{1}{9} \\ & \frac{\frac{3}{10} + \frac{1}{6} \times \frac{1}{3}}{\frac{10}{3} + \frac{1}{18}} \text{ of } \frac{4}{15} \div \frac{1}{3} \div \frac{1}{3} \times \frac{1}{6} \\ & = \frac{\left(\frac{10}{3} - \frac{5}{2} \right) \div \frac{1}{4} \text{ of } \frac{5}{4}}{\frac{10}{3} + \frac{1}{18}} \text{ of } \frac{4}{15} \div \frac{1}{3} \div \frac{1}{27} \\ & = \frac{\frac{5}{6} \div \frac{5}{16}}{\frac{27}{10} + \frac{1}{18}} \text{ of } \frac{4}{15} \div \frac{1}{3} \times \frac{27}{1} \\ & = \frac{\frac{8}{3}}{\frac{90}{32}} \text{ of } \frac{4}{15} \div \frac{81}{2} = \frac{8 \times 90}{3 \times 32} \text{ of } \frac{4}{15} \div \frac{81}{2} \\ & = \frac{8 \times 90}{3 \times 32} \times \frac{4}{15} \times \frac{2}{81} = \frac{4}{81} \end{aligned}$$

143. Option (4) is correct.

5 digit number is 538xy

Let us take 54000 as 5-digit number

\therefore LCM of (3, 7, 11) = 231

On dividing 54000 by 231

$$\frac{54000}{231} = 233.76$$

We will find the multiple which can give us the number starting with 538...

$\Rightarrow 231 \times 233 = 53823$

Our number is 53823.

$\Rightarrow x = 2, y = 3 \therefore x^2 + y^2 = 2^2 + 3^2 = 13$

144. Option (2) is correct.

Number of students in A & B

$$= \left[\frac{36^\circ + 64.8^\circ}{360^\circ} \right] \times 9000 = 2520$$

$$\text{Number of students in E} = \frac{118.8^\circ}{360^\circ} \times 9000 = 2970$$

E exceeds by A & B = $2970 - 2520 = 450$

\therefore 450 lies between 440 & 460

145. Option (1) is correct.

Person rows a distance of $3\frac{3}{4}$ km upstream in $1\frac{1}{2}$ hours.

$$\therefore \text{Speed in upstream} = \frac{3\frac{3}{4}}{1\frac{1}{2}} = \frac{15/4}{3/2} = \frac{30}{12} = \frac{5}{2} \text{ km/h}$$

Person rows a distance of 13km downstream in 2 hours.

$$\therefore \text{Speed in downstream} = \frac{13}{2} \text{ km/h}$$

Speed of person in still water

$$= \frac{\text{downstream speed} + \text{upstream speed}}{2}$$

$$= \frac{\frac{13}{2} + \frac{5}{2}}{2} = \frac{9}{2} \text{ km/h}$$

Time to travel 90 km in still water person will take =

$$\frac{90}{\frac{9}{2}} = \frac{90 \times 2}{9} = 20 \text{ hours.}$$

146. Option (3) is correct.

Let speed of B train = x km/h

\therefore Speed of A train = $x - 16$ km/h

$$\Rightarrow \text{Time to travel 384 km by B} = \frac{384}{x} \text{ h}$$

$$\text{and time to travel 384 km by A} = \frac{384}{x - 16} \text{ h}$$

According to question,

$$\frac{384}{x - 16} - \frac{384}{x} = 4 \Rightarrow \frac{x - x + 16}{x^2 - 16x} = \frac{4}{384}$$

$$\Rightarrow x^2 - 16x - 1536 = 0 \Rightarrow (x + 32)(x - 48) = 0$$

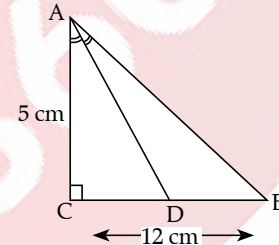

$$\Rightarrow x = -32$$

but speed cannot be -ve

$$\therefore x = 48$$

So, speed of train B = 48 km/h

147. Option (3) is correct.

\therefore AD is bisector of $\angle A$

\therefore By angle-bisector theorem

$$\frac{AC}{AB} = \frac{CD}{DB} \quad \dots(i)$$

In right $\triangle ABC$

$$AB = \sqrt{AC^2 + BC^2}$$

(By Pythagoras theorem)

$$= \sqrt{5^2 + 12^2} = \sqrt{25 + 144}$$

$$= \sqrt{169} = 13 \text{ cm}$$

put all these value in equation (i),

$$\frac{5}{13} = \frac{CD}{DB}$$

$$\Rightarrow CD : DB = 5 : 13$$

Let $CD = 5x$ cm and $DB = 13x$ cm

$$BC = CD + DB = 5x + 13x = 18x \text{ cm}$$

$$\Rightarrow 18x = 12$$

$$\Rightarrow x = \frac{2}{3}$$

$$\Rightarrow CD = 5 \times \frac{2}{3} = \frac{10}{3} \text{ cm}$$

In right $\triangle ACD$

$$AD = \sqrt{CD^2 + AC^2}$$

[By pythagoras theorem]

$$= \sqrt{\left(\frac{10}{3}\right)^2 + 5^2} = \sqrt{\frac{100}{9} + 25}$$

$$= \sqrt{\frac{100 + 225}{9}} = \sqrt{\frac{325}{9}} = \frac{5\sqrt{13}}{9} \text{ cm}$$

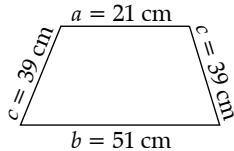

148. Option (3) is correct.

Given: $a = 500, b = 502, c = 504$

$$\therefore a^3 + b^3 + c^3 - 3abc = [a + b + c] [a^2 + b^2 + c^2 - ab - bc - ca]$$

Put the values $a, b,$ and c

$$\begin{aligned} a^3 + b^3 + c^3 - 3abc &= [500 + 502 + 504] [500^2 + 502^2 + 504^2 - 500 \times 502 - 502 \times 504 - 504 \times 500] \\ &= (1506) [250000 + 252004 + 254016 - 251000 - 253008 + 252000] \\ &= (1506)(12) = 18072 \end{aligned}$$

149. Option (2) is correct.

Since, non parallel sides of trapezium are equal. so it is an isosceles trapezium.

Area of isosceles trapezium

$$\begin{aligned} &= \frac{1}{2} \times (a + b) \times \sqrt{c^2 - \left(\frac{b-a}{2}\right)^2} \\ &= \frac{1}{2} \times (21 + 51) \times \sqrt{39^2 - \left(\frac{30}{2}\right)^2} \\ &= \frac{1}{2} \times 72 \times \sqrt{39^2 - 15^2} = 36 \times \sqrt{1521 - 225} \\ &= 36 \times \sqrt{1296} = 36 \times 36 = 1296 \text{ cm}^2 \end{aligned}$$

Area of given trapezium = 1296 cm^2

150. Option (4) is correct.

Let the number is x .

$$\therefore 66.66\% \text{ of } 75\% \text{ of } \frac{1}{8} \text{ of } x = 179$$

$$\Rightarrow \frac{66.66}{100} \text{ of } 75\% \text{ of } \frac{1}{8} \text{ of } x = 179$$

$$\Rightarrow \frac{2}{3} \times 75\% \times \frac{1}{8} \times x = 179$$

$$\Rightarrow \frac{2}{3} \times \frac{3}{4} \times \frac{1}{8} \times x = 179$$

$$\Rightarrow x = 179 \times 16$$

$$\begin{aligned} 33\% \text{ of } \frac{3}{4} \text{ of } (179 \times 16) &= \frac{1}{3} \times \frac{3}{4} \times 179 \times 16 = 179 \times 4 \\ &= 716 \end{aligned}$$

\therefore Required answer is 716

151. Option (4) is correct.

This question tests a student's vocabulary. The incorrectly spelled word is "explanation". It should be "explanation".

152. Option (4) is correct.

The blank requires a singular verb because the subject "the majority" is always treated as a singular number.

153. Option (3) is correct.

This question tests a student's vocabulary. Jeopardy means the danger of loss, harm, or failure. Example: "The whole peace process is in jeopardy". Peril means danger.

154. Option (4) is correct.

The sentence is grammatically correct, so no substitution is required.

155. Option (4) is correct.

The sentence should be in the present tense because the later half of the sentence mentions "for now". This means that the action started in the past and is

continuing in the present. So, the use of the present perfect continuous tense is required here.

156. Option (3) is correct.

Refer to the lines from the passage: "Rivers and canals pour sewage, detergents, and industrial waste into the sea; tankers flush their contents near the river or sea; bottles, rotting garbage, and oil slicks are washed into the beaches. The phosphates and nitrates applied to farmlands as inorganic fertilizers, concentrate in lakes and estuaries, causing algal blooms." These lines make it clear that pollution is responsible for algal blooms.

157. Option (2) is correct.

Refer to the line from the passage: "Water pollution has acquired dangerous dimensions ever since sewage and industrial effluents have started being disposed of into the rivers."

158. Option (3) is correct.

From the line, "The intensity of air pollution in Indian cities is increasing primarily due to our vintage vehicles and their poor performance." Option (1) is true. From the line, "Our atmosphere seems to have become a waste basket into which dust, noxious fumes, toxic gases, and other pollutants are callously thrown." We can deduce option (2). And from the line, "Widespread use of coal and fossil fuels in industries and petroleum fuel in motor vehicles has aggravated the air pollution problem." We can derive option (4). But option (3) is not mentioned in the passage. Hence, it is not true as per the passage.

159. Option (2) is correct.

The passage is about various types of pollution. Thus, the suitable title for the passage is "We Breathe and Drink Poison".

160. Option (3) is correct.

Refer to the line from the passage: Rapid industrialization has led to a deterioration in the quality of the air. From this line, it is clear that the chief reason for air pollution is industrialization.

161. Option (4) is correct.

This question tests a student's vocabulary. The correctly spelled word is "humiliated".

162. Option (3) is correct.

There is an error in word usage. "One of the" is followed by a plural noun; hence, the correct word should be "reforms".

163. Option (4) is correct.

This question tests a student's vocabulary. Endurance means to bear or continue. Example: "She was close to the limit of her endurance." The antonym of "endurance" is indolence.

164. Option (4) is correct.

This question tests a student's understanding of idioms and phrases. "For good" means "forever".

165. Option (1) is correct.

This question tests a student's understanding of idioms and phrases. "Fell flat" means to fail or be ineffective. Good luck—the last time management tried to implement a new dress code, that measure fell flat.

166. Option (1) is correct.

This question tests a student's vocabulary. "Adept" means very skilled or proficient at something. Example: "She is adept at cutting through red tape." The antonym of adept is "inept," which means having or showing no skill; clumsy.

167. Option (1) is correct.

This question tests a student's vocabulary. A decision that cannot be taken back is called an irrevocable decision. Infallible means incapable of making mistakes

- or being wrong. Irrational means not rational, such as not endowed with reason or understanding, lacking usual or normal mental clarity or coherence. Indelible means making marks that cannot be removed.
168. **Option (3) is correct.**
This question tests a student's understanding of idioms and phrases. To have too many irons in the fire means to be engaged in too many activities or undertakings at once and thus to be unable to give adequate attention to any one of them, therefore risking failure or mistakes.
169. **Option (2) is correct.**
This question tests a student's vocabulary. A statement open to more than one interpretation is called an ambiguous statement. Ambrosial means having a very pleasant taste or smell. Ambidextrous is a person who is able to use the right and left hands equally well. Ambushed means to make a surprise attack on (someone) from a concealed position.
170. **Option (2) is correct.**
The sentence has an error in the preposition. The distinction between "compared to" and "compared with" is subtle but very important. "Compared to" is meant to be used when you're highlighting similarities or likening one thing to another. But "compared with" is supposed to be used when you're focusing on the differences between the two items being compared. The given sentence highlights the difference between forged and original. Hence, the correct preposition here is "with".
171. **Option (4) is correct.**
The sentence is grammatically correct. Hence, no change is required.
172. **Option (3) is correct.**
This question tests a student's vocabulary. Ignominy means public shame or dishonour.
173. **Option (2) is correct.**
The sentence has an error in the preposition. The word "let" is always followed by a verb in the infinitive form (without to) in a sentence that is in the active voice. So, the preposition to, should be removed from the sentence.
174. **Option (4) is correct.**
This question tests a student's vocabulary. One who travels by foot is known as a pedestrian. A propagandist is someone who disseminates propaganda. A protagonist is the leading character or one of the major characters in a play, film, novel, etc. A paediatrician is someone who treats children.
175. **Option (2) is correct.**
The sentence is a conditional sentence. The basic structure of a conditional sentence should be 'If + simple present, Simple future tense'. Here, the if clause should be replaced with a simple present clause. So, the correct rephrasing will be: If you bring.
176. **Option (2) is correct.**
This question tests a student's vocabulary. The correctly spelled word is "omelette".
177. **Option (2) is correct.**
Sanction means official permission or approval for an action. Example: "He appealed to the bishop for his sanction." The synonym of sanction is approval.
178. **Option (4) is correct.**
The correct preposition for filling the blank is "in", because "in ink" is the correct idiomatic expression, which means on paper.
179. **Option (3) is correct.**
This question tests a student's understanding of idioms and phrases. To die in harness, means to keep on working to the end.
180. **Option (2) is correct.**
This question tests a student's understanding of idioms and phrases. Carry the day means to gain victory or be successful.
181. **Option (2) is correct.**
Incessant means (of something regarded as unpleasant) continuing without pause or interruption. Example: "The incessant beat of the music created annoyance." Intermittent means occurring at irregular intervals; it is not continuous or steady. Transient means lasting only for a short time; impermanent. Inconstant means frequently changing; variable, or irregular.
182. **Option (4) is correct.**
Mortality means the state of being subject to death. Example: "The work is increasingly haunted by thoughts of mortality." The antonym of mortality is "birth".
183. **Option (2) is correct.**
Since the sentence compares the number of employees. The determiner "many" is the correct word to fill in the blank.
184. **Option (4) is correct.**
The sentence has a grammatical error. "No other" is followed by "than". Thus, "but" should be replaced with "than".
185. **Option (2) is correct.**
The question tests a student's vocabulary. Fatigue means a lack of energy and motivation. Hence, the synonym for "fatigue" is weariness.
186. **Option (3) is correct.**
The question tests a student's vocabulary. The incorrectly spelled word is "trenquility". It should be tranquility.
187. **Option (1) is correct.**
The question tests a student's vocabulary. Animals living in flocks are "gregarious". Bohemian means a socially unconventional person, especially one who is involved in the arts. Herbivorous means feeding on plants.
188. **Option (4) is correct.**
The question tests a student's vocabulary. Reckless means heedless of danger or the consequences of one's actions; rash or impetuous. The antonym of it is reckless is cautious.
189. **Option (2) is correct.**
The question tests a student's vocabulary. Insidious means proceeding in a gradual, subtle way, but with very harmful effects. The antonym of insidious is sincere.
190. **Option (3) is correct.**
The question tests a student's vocabulary. One who holds established opinions is called an orthodox person. An atheist is a person who believes in God. Missionary means a person sent on a religious mission, especially one sent to promote Christianity in a foreign country.
191. **Option (1) is correct.**
The question tests a student's vocabulary. The incorrectly spelled word is "ecstasy". It should be ecstasy, which means extreme happiness.
192. **Option (2) is correct.**
The given sentence has an error of parallel construction. In the given question sentence, various reasons are given as nouns except 'desiring' which is a verb. Here, 'desire' as a noun should be used rather than the verb form of 'desire'.
193. **Option (1) is correct.**
The sentence has an error in subject verb agreement. The subject "monsoon" is a singular noun, so it should be followed by a singular verb. The singular verb 'has' should be used in place of 'have'.

194. Option (4) is correct.

In the sentence, "postponed" is a transitive verb, and it should be followed by an object and not by a preposition.

195. Option (3) is correct.

The clue in the given sentence is "anything". It has a negative connotation, hence the pronoun in the blank should be negative. Thus, the correct word to fill the blank is "none".

196. Option (3) is correct.

The given options in the sentence are as followed:

Assured (adjective): something that is guaranteed

Ensure (verb): to make sure

Sure (adjective): to be certain

Surely (adverb)-without doubt.

The given blank is followed by the verb "opt", so the blank should be filled with an adverb.

197. Option (1) is correct.

The word in the given blank should refer back to the place where the person can get some minimum amount of return on his investment. The apt word in this context is "where", because it refers to a place. When refers to at what time; in reference to time.

Wherefore refers to a reason. Whenever- at any time.

198. Option (1) is correct.

'As' is used in the form of an adverb to emphasise an amount of something like as many as, as much as, etc. The given sentence asserts that a person should invest where he/she can get a minimum amount of return on his investment. In this context, the apt word is "as".

199. Option (3) is correct.

The word tenure means the total time period of any process or activity. The given sentence asserts that a person should invest where he/she can get a minimum amount of return on his investment. And by the end of that period of time, the person gets the fixed amount. In this context, the best word is "tenure."

200. Option (1) is correct.

The given the sentence asserts that a person should invest where he/she can get some minimum amount of return on his investment. And by the end of that period of time, the person gets the fixed amount. The said amount will include the amount invested and the interest promised. We need a word that combines these two, and the best word for this in the given blank is "along", because only along among the given options can be followed by the preposition "with".

●●●
