Read the passage and answer the questions.

It is a truth universally acknowledged that every happy home should have a dog. Ours was a happy family but missed a dog. Our family comprised us four siblings, the parents and the grandfather. Our grandfather, who we called dadaji, was an awesome person – a strict disciplinarian and a bit whimsical. One fine morning happiness exploded in our courtyard. Our maid had rescued a puppy from being crushed on the road and she came straight to our house. He was the cutest puppy we had ever seen. He was not a pedigreed one but was intelligent and had playful eyes. His white coat bore dark black tiger stripes. No sooner had he come to our house than he started

playing with us as if he had found his old friends. Our maid

called him Moti and it was approved by all instantaneously.

But there was a catch. Dadaji never liked dogs. Our happiness was doused with the clearly visualised apprehension that Dadaji would throw away the puppy along with the maid from the house. Sensing the problem our mother devised a cogent argument to convince him of the utility of the puppy. Mother tried to convince Dadaji looked that the puppy, when he grew up, would protect the house against thieves. Dadaji looked at the puppy in a measured way and derisively commented: "Let's see", and reclined on the easy chair with a newspaper in his hands. It was typical of him – whenever he would concede somebody's argument he would recline on his favourite easy chair with a newspaper.

For three months ours was the happiest family in the world. But dogs will be dogs. Moti committed a huge mistake. Our Dadaji used wooden sandals with leather straps as footwear. On that fateful night Moti, nothing else attracting his attention, smelled something leathery and started chewing the leather straps off the sandals. By morning the leather straps were reduced to smithereens.

When Dadaji woke up in the morning and lowered his feet to wear the sandals he was aghast. The sandals were missing.

In the courtyard he saw the shocking scene of the total destruction of his sandals. From disbelief to anger and from anger to rage, within two minutes Dadaji was a fireball. "where is Moti?" he shouted, heaving heavily. All of us including mom were looking for cover. Moti too realised his mistake and its consequences. He sheepishly sneaked behind the dining table. But his fate had been sealed.

Read the passage and answer the questions.

A woman who rides the success wave as an underwater photographer or a pilot, financial adviser, management consultant, pearl diver, bartender, bus driver or police officer, is very often suddenly swung back looking for answers after she becomes a mother.

And there comes a phase when she has to choose between motherhood and a thriving career. The former takes precedence for many as it becomes the purpose for the latter to exist. To work or not to work: this Hobson's choice imposes a high cost on both individual and society. As a result, many professionals reject motherhood entirely. Others delay child-bearing for so long that they are forced into the arms of the booming fertility industry. Some choose not to work at all, representing a loss to collective investment in talent. But a choice must be made!

Conventionally, a mother is seen putting the others before herself. She is known for slaying her own sphere bit by bit to build a new world for her child. Thereupon, motherhood and sacrifice get conjoined in a way that both become inseparable. What merits attention is to understand a woman's struggle of answering the individual within her! Her circumstances post-delivery (over which she hardly has any control) conveniently rob her of the goalpost she fielded half her life, that is, her career. Neither money nor family can restore what is lost when she loses her career.

To map the paradigm of this loss-gain conundrum, let's examine women in the empowered and non-empowered categories. The first lot have financial, ideological, emotional resources to recreate a career. It is the latter that gets sandwiched between their call for motherhood and a slipping career.

Noticeably, education is the least responsible factor for their deplorable situation. Instead, it is the educated bunch who are more frustrated than their uneducated counterparts; the ones who had carefully worked on a skill and climbed up the success ladder, only to embrace identity crises.

It is important to close the vacuum of a lost career as soon as it appears. At risk is a woman's individuality, her self-esteem that constitutes the very purpose of her being. Else, a long hiatus from work can consume even a well-minded woman and push her into depression.

- **192.** Who are better off after child birth?
 - 1. Neither the empowered nor the unempowered women

 - 3. Both the empowered and the unempoweed women

 - 2. the taking up of a new career

- 3. the thriving careers before childbirth
- 4. the responsibilities on becoming a mother

Read the passage and answer the questions.

Ever wondered how efficiently the brain works on waking up in the morning even before the system has had a chance to ingest the hot cuppa! If I could replace myself with a robot, the latter would need to train through 39 steps across different levels (kitchen platform, refrigerator and stove), three states (solid, liquid and gas), managing several timed intervals between sub-tasks.

Yet, once done, it will be a spectacle to watch: steps executed with such precision and dependability, will be a given.

What's more, it will address multiple tasks in interleaved fashion by harvesting the in-betweens. The time between putting the oil in the wok and dropping the seasoning once the oil is heated, between placing the rolled chapati on the tava and flipping the partially roasted piece: such snippets of time that the human uses up to ponder will be efficiently utilised by a robot.

To a robot, thinking is a challenge! But it will turn its thinking disability to advantage. Time division multiplexing in its finest resolution will be in action. Imagine chopping a pair of beans in between flipping chapatis; or shelling boiled eggs as the oil in the wok gets heated.

Who can give up the joy of watching a phoolka puff into a ball on the fire, each puff bringing added cheer. Yet, to a robot it will be a sight lost in vain. For, our busybody will be placing a bottle under the water purifier to fill water when a phoolka puffs, and switching off the button when the next one repeats the feat.

Imagine what will happen when such a robot does come into shape. Mad with joy at gaining one hour of precious morning time, humanity will buy it. Next, the additional hour will be played with. The workaholic will add that hour to work hours. Those committed to physical well-being will hit the gym, and a handful will go jogging.

Yet, soon deeper realisation will set in. Sleeping off the extra hour will seem a logical stable state and will be welcomed by all. Until, even sleeping gets boring. In due course of time, the fate of my robot will be no different from that of the many fancies mankind has evolved through. The "going back to roots" movement will find a new entrant. Like the shift from refined to whole, from polished to brown, from cooked to raw, we will retrace our steps. The robot discarded into the e-waste bin, we would make our entry back into the kitchen. Many of the once-familiar sights and smells would then drift back into our senses slowly.

- **196.** In what context does the writer mention: doing extra work, hitting the gym and jogging?
 - 1. General activities of all adults.
 - 2. Activities disliked by lazy people.
 - 3. Activities people will indulge in when robots do kitchen work
 - 4. Activities people do to keep themselves busy.

Answers with Explanations

1. Option (3) is correct.

Hence, the missing number is 99.

2. Option (3) is correct.

Given series: LYR, JWP, HUN, FSL, ?

Table of Alphabetical series (point to remember):

Alphabets	A	В	C	D	E	F	G	Н	I	J	K	L	M
Positional value	1	2	3	4	5	6	7	8	9	10	11	12	13
Alphabets	Z	Y	X	W	V	U	T	S	R	Q	P	o	N
Positional value	26	25	24	23	22	21	20	19	18	17	16	15	14

Hence, the missing term is DQJ.

3. Option (1) is correct.

Correct order:

2. Distance	3. Distilled	5. Distort	4. Distribution	1. Disturb
-------------	--------------	------------	-----------------	------------

Hence, Disturb will appear last.

4. Option (3) is correct.

The logic follows here is:

(Sum of place values of the alphabet of the given word) \times (Number of alphabets) = Given code

FRISK

Number of alphabets = 5

$$(F + R + I + S + K) \times 5 = (6 + 18 + 9 + 19 + 11) \times 5 = 63 \times 5 = 315.$$

Number of alphabets = 6

$$(D + O + U + B + L + E) \times 6 = (4 + 15 + 21 + 2 + 12 + 5) \times 6 = 59 \times 6 = 354.$$

Similarly, TENT Number of alphabets = 4

$$(T + E + N + T) \times 4 = (20 + 5 + 14 + 20) \times 4 = 59 \times 4 = 236.$$

5. Option (2) is correct.

SOBER' is written as 'THFTY'.

Similarly: 'FIRST be written as:

Hence, VVVNL is the correct answer.

6. Option (4) is correct.

Given expression: $19 \times 12 - 51 \div 34 + 17 = 197$

Solve options by options: Take option (4)

Interchange 34 and 51, + and ÷

Hence, on interchanging:

$$19 \times 12 - 34 + 51 \div 17 = 197$$

LHS =
$$19 \times 12 - 34 + 51 \div 17$$

USING BODMAS Rule

$$= 19 \times 12 - 34 + 3$$

$$=228-34+3$$

$$= 228 - 31 = 197 = RHS$$

7. Option (2) is correct.

Given expression: TURNIP: QTSQJO:: RADISH:?

Similarly,

Hence, CZQITJ is the correct answer.

8. Option (4) is correct.

As per the pattern followed and the symmetry, the required figure is:

9. Option (3) is correct.

Given that:

8	9	73
11	25	?
7	14	63

In a row.

 $(First number)^2 + Second number = Third number$

In row 1,

$$8^2 + 9 = 64 + 9 = 73$$

In row 3,

$$7^2 + 14 = 49 + 14 = 63$$

Similarly, In row 2, $11^2 + 25 = 121 + 25 = 146$

10. Option (2) is correct.

Hence, Urmi and Shanaya are sitting in the corners.

11. Option (4) is correct.

Conclusions:

- Some inkpots are candies. → False (Since there is no relation between inkpots and candies, it is possible but not definite. Hence, false.)
- Some kettles are inkpots. → True (As some inkpots are kettles, some kettles will definitely be inkpots.)
- Some candies are inkpots. → False (Since there is no relation between candies and inkpots, it is possible but not definite. Hence, false.)

Hence, "Only conclusion 2 follows".

12. Option (2) is correct.

As per the pattern followed and the symmetry, the required figure is:

13. Option (1) is correct.

If U = M, J=R and J = S < T, then

Checking the options:

- (1) $M > T \rightarrow False (M > R = J = S < T \Rightarrow The relation between M and T cannot be established)$
- (2) $J < U \rightarrow True (U = M > J \Rightarrow U > J \text{ or } J < U)$
- (3) $J < T \rightarrow True (J = S < T \Rightarrow J < T)$
- (4) $R = S \rightarrow True (R = J = S \Rightarrow R = S)$

So, only option 1 is not correct.

Hence, the correct answer is "M > T".

14. Option (3) is correct.

Given series: DZP, SCG, JFV, YIM, PLB,?

16. Option (1) is correct.

In column-wise operation,

The sum of the square root of first number + cube-root of second number = the third number

121	64	144
27	?	8
14	12	14

Column 1:

14 = 14

$$\sqrt[2]{121} + \sqrt[3]{27} = 14$$
$$11 + 3 = 14$$

$$\sqrt[2]{64} + \sqrt[3]{?} = 12$$
$$8 + \sqrt[3]{?} = 12$$

Column 2:

$$\sqrt[3]{?} = 12 - 8$$

 $\sqrt[3]{?} = 4$

$$\sqrt[3]{?} = 4$$

? = $(4)^3$
? = 64

Column 3:

$$\sqrt[2]{144} + \sqrt[3]{8} = 14$$

$$12 + 2 = 14$$

$$14 = 14$$

17. Option (3) is correct.

Given series: 44, 22, 22, 33, 66, ?

$$1000 = 10^3$$

$$1000 = 1000$$

In Row 2:

$$81 \times 9 = 9^3$$

$$729 = 9^3$$

$$729 = 729$$

Similarly, In Row 3:

$$? \times 16 = 8^3$$

$$? \times 16 = 512$$

$$? = 512/16$$

Hence, the missing number is 32.

19. Option (4) is correct.

$$81 = 81$$

Row 2:

 $(4)^4 = ? + 166$

256 = ? + 166

? = 256 - 166

? = 90

Row 3:

 $(2)^4 = 3 + 13$

16 = 16

According to the question:

Now, Triangle "PRO" is a right-angled triangle, so using Pythagoras Theorem:

$$RP^2 + PQ^2 = RQ^2$$

$$y^2 + (40)^2 = (50)^2$$

$$v^2 = 2500 - 1600$$

$$y^{2} = 900$$

$$y = \sqrt{900}$$

$$y = 30 \text{ m}$$

Now, Triangle "PQS" is a right-angled triangle, so using Pythagoras Theorem:

$$SP^{2} + PQ^{2} = SQ^{2}$$

$$x^{2} + (40)^{2} = (50)^{2}$$

$$x^{2} = 2500 - 1600$$

$$x^{2} = 900$$

$$x = \sqrt{900}$$

$$x = 30 \text{ m}$$

The distance between the Prakash's house and Daksh's house = x + y,

Regur Soil, also known as black soil, is typical of the Deccan trap region, which is distributed across the northwest Deccan plateau. Regur dirt, also referred to as black soil or black cotton soil, is excellent for growing cotton. The soil is abundant in soil nutrients like lime, potash, calcium carbonate, magnesium, and calcium. In general, dark soils have little phosphoric concentration. The clayey soil that makes up the black or regur soils is widely known for its ability to hold moisture. When wet, they expand and become sticky; when dried, they contract. As a result, this soil creates noticeable fractures throughout the dry season. Consequently, a form of "self-ploughing" takes place. The dirt is a dark grey to deep black tone. On the Deccan lava plateau and the Malwa plateau, primarily in the interior of Gujarat, Maharashtra, Karnataka, and Madhya Pradesh, black soils are produced from trap lava.
